

Before I start to explain my way with Genesis, I have to say something.

First thing, English is not my mother tongue, so sorry for criss cross English.

Second, all my thanks go to Realjumper.

For two years now, is he on my site and I learned a lot from him.

I know he is not a big fan of MA's, I respect that and don't want to crash the Genesis-Thread, that's why I create this PDF now.

Third thing, I don't like the name “Guppy” lol, this is why I call the MA's as “Bundle”

Last thing, I can't promise, that you will after my explanation exactly this see on the chart what I see. We all different, and have a different view of things. I do my best to explain, HOW I read MY chart.

Lets start!

Settings of the MA Bundle.

Fast Bundle:

5 EMA (thick white)

8 EMA (blue)

10 EMA (blue)

12 EMA (blue)

15 EMA (blue)

Slow Bundle:

30 EMA (purple)

35 EMA (red)

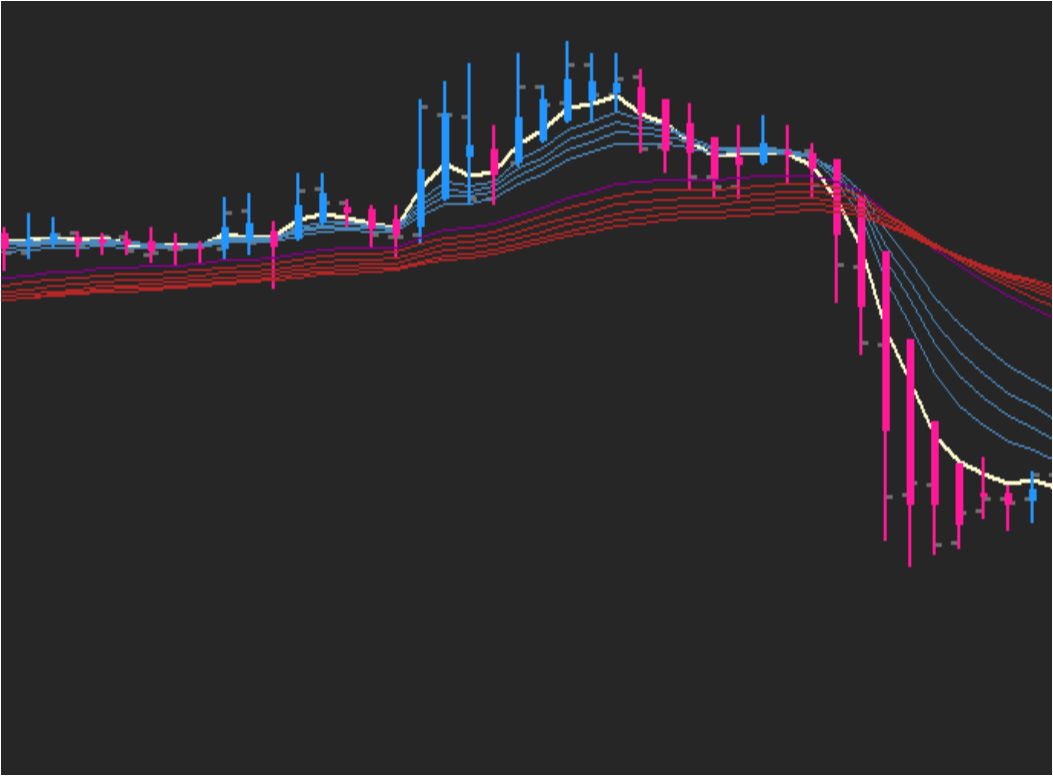

40 EMA (red)

45 EMA (red)

50 EMA (red)

55 EMA (red)

No matter which timeframe I trade, I need clear MA's for a good trend.

What I mean with CLEAR MA's?
See below.

When both Bundles not clear, there is NO entry for me.
Example-->

When one bundle in the other bundle, that mean the pair don't know exactly what it want, OR the trend will change.

So, that's it.
Clear Bundles + Genesissignal= **entry**

Easy or not?

Which pivots you use, is on your hand.
I am not responsible which trades you take or not.
The Bundles are not magic and without a good understanding from the market you would ever lose.

PLEASE, don't send me messages with question: Why would this a looser and and and.

AGAIN, I will give you later MY template WITHOUT pivots, ATR ect indicators.

Also its important which Pair you would trade. I don't want to explain which pair is good or not.
I cant do this, because, we all see things different. One guy can trade GU or EU, I trade right now only EURAUD.
Because, this pair is so trendy and has lot of good movements, FOR ME.

So, now how I trade M1 to M5.
I need a clear Bundle on M5 and
for an M1 entry, NO MATTER
how the Genesis looks on M5.
When I took M1 entry, just M1
Genesis is important and M5
Bundle need to be clear.
Example-->

One of you would mean now,
but when I look only on M1 I get
a bunch more trades.

Well, thats right, but you need a
perfect understanding of the
market.

THIS is MY way and I don't
have to explain why I decide to
trade like this.

It work for me very well.

I trade just EA and get 99% my 50 pips on a day.

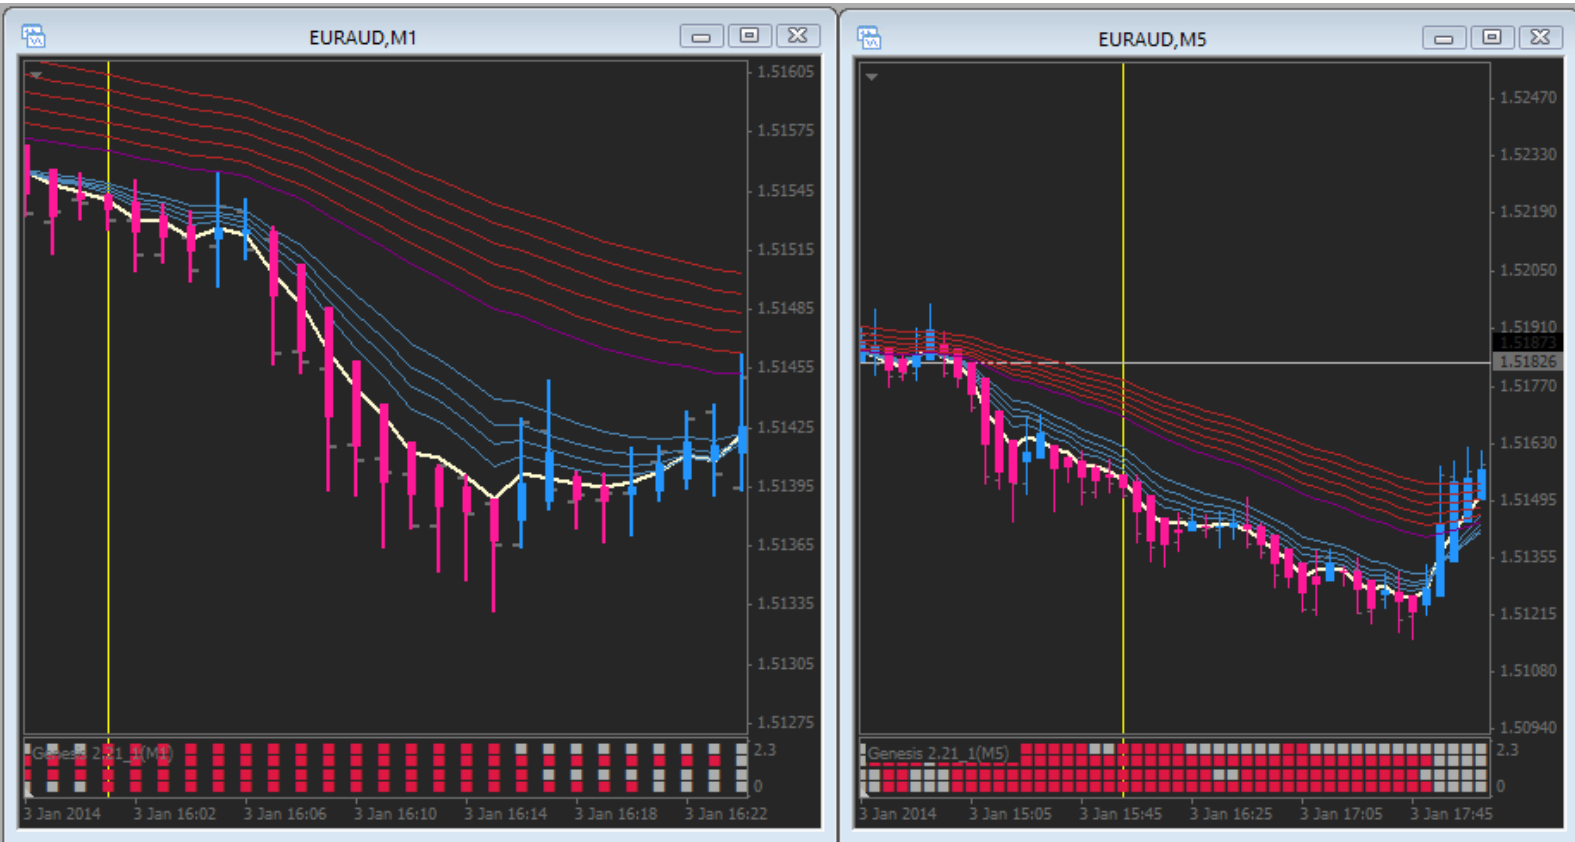

When I able to catch more, because of a good market, I take it.

Its possible to trade THIS style aggressive, BUT this is more for expert Trader. I think, its enough that I show you, how easy you can the see trend of a pair.

You also able to take 2 or 4 pairs, set it up on timeframe 5 and wait for perfect entry's, well, why not.
But I don't have to do this. I am fine with ONE pair and thats EA and I have a hard sl and tp of 20pips. Well, sometimes, depend on the market I close my M1
entries earlier.
Then, 5 entries on a day with tp 10 are also 50 pips ;-)

I don't want to mess the Genesis Thread, and also I hate to get a bunch of PM's
When you have a question, you can find me on Skype under **fameofme**.

When I have time, I am willing to answer your question.
But I am not willing to train peoples on the Forex market.
You need to understand how the market, when and how reacted.

My template:

<http://www.mediafire.com/view/cc12313pbgdc2ch/fom.tpl>

Don't think complicate. Trade well and easy.
