## See the Story

## See the Results

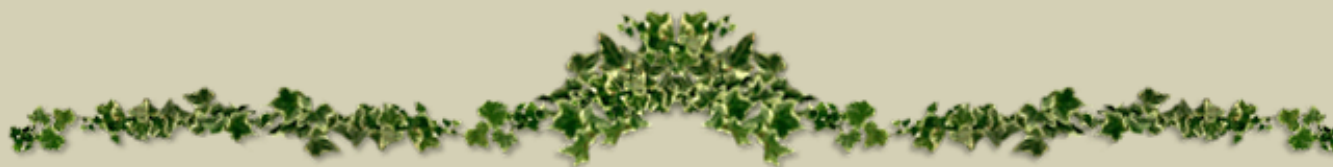

# Become a part of the Phenomenon.

Ok, we admit it. We have spent many weary nights questioning whether we should release our incredible trading system to the public.

But at the end of the day, we figured that we had already made so much money, that we really didn't have anything to lose. We have been fortunate enough to be blessed with great intelligence and now we would love to share it with you.

For years now we have been using our successful strategy to place trades day in and day out. We have mastered a system that scalps the market whenever there is any price movement, and its 100% programmed and ready to begin trading for you.

It's true.... The IvyBot is one of the most revolutionary automatic robots to hit the market.

**Ivybot can trade any account size...  
That's right ANY ACCOUNT SIZE!**

\$50 – No Problem

\$500 – No Problem

\$2,500 – No Problem

\$5,000 – No Problem

**Start with any amount**

So why does Ivybot succeed while all others fail?

The reasons are endless but one prime cause stands out

**Back tests ALONE are worthless...  
Period, end of story.**

**We don't ONLY rely on back test results !**

Here is why... As you know the markets constantly change. Ivybot is intuitive enough to recognize not only major shifts in market patterns but minor ones too!

Simply put... a robot that made money in a back test a few months ago probably will not work today.

Let us be clear Ivybot back tests are amazing.

However, the best results are found in real day to day trading.

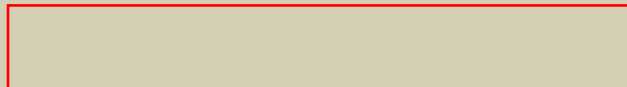

**Now it is time to get real... are you ready?**

***Instant Cash***

## **Our Story**

In the early 90's, our group of college friends tackled the markets head on. We were studying at a very prestigious university, name withheld, and were trading right out of the dorms. We worked a variety of markets; Stocks, Bonds, Futures and Options...having a great deal of success trading each. But when the markets closed every day, we were still hungry for more. The retail Forex world was just beginning to expand and the 24 hour market was appealing. Brokerages were beginning to open their doors to everyday guys looking to take part in changes in world currencies. We pooled our money together, moved all of our computers into one room and split shifts trading the account.

The rest was history...

## But why did we make it big?

Throughout life we were never considered to be very cool or popular. We never got the pretty girl or the invite to the big party. But that was ok, because we were always smarter than everyone else. We were nerds, yes NERDS!! We wanted to learn everything we could about anything. We spent long nights at the library studying a variety of subjects, but Math was our favorite. Numbers and calculations came very easy to us and we loved playing with them. We played with them until they became our friends, and those same big numbers in school became big numbers in our bank accounts; because while everyone was out having a good time, we were finding ways to make it BIG.

$$(c(z), R)_{z_{k-1}} \rightarrow B^G(c(z), R) \rightarrow B^G(c(z), R)^{z_1}$$

$$B^G(z(z), R) \rightarrow B^G(z(z), R) \rightarrow B^G(z(z), R)^{z_1}$$

## But how did we do it?

It's simple, every robot on the market today has 1 system (robot) trading multiple currency pairs. This didn't make sense to the Ivybot team and it shouldn't make sense to you either. That's where the real genius of Ivybot comes in. Ivybot gives you 4 Robots, 1 for each currency pair in which it was designed. How can the other systems possibly have **ONE** piece of code capable of performing all the calculations on more than one currency pair? **THEY CAN'T!** Ivybot has a robot that is designed, optimized, and perfectly tailored to trade each currency pair, and we give you four of them. Look at the four codes you will get...

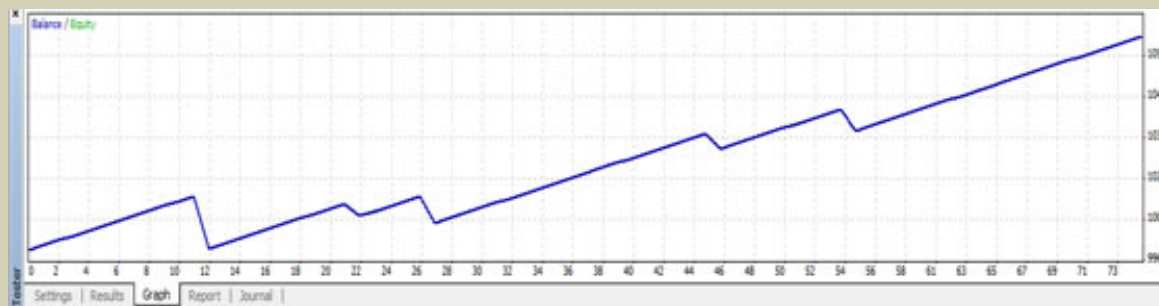

## Performance

Ivybot is not just the only robot that gives you unlimited updates and a separate robot for each currency pair, Ivybot is hands down the most profitable Robot ever created! Ivybot has been back tested, optimized, and forward tested to do one thing, **MAKE MONEY!** Look at some of the performance reports below...

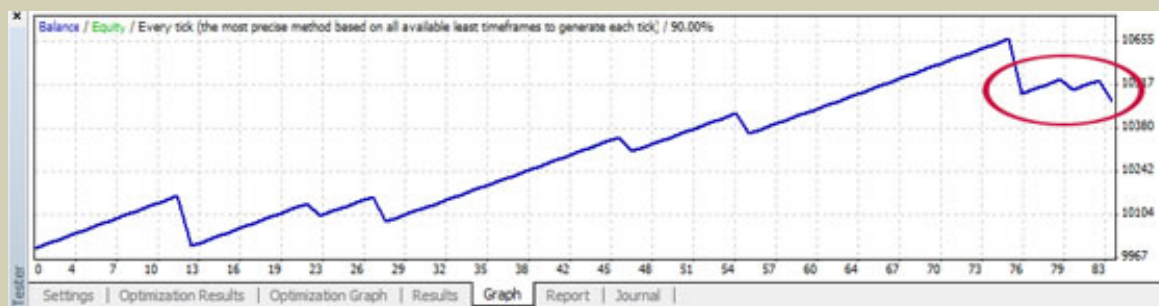

<b>2009 Performance:</b> <b>523.98% (190 DAYS)</b>	<b>2008 Performance:</b> <b>745.11%</b>	<b>2007 Performance:</b> <b>691.87%</b>
<b>2006 Performance:</b> <b>475.89%</b>	<b>2005 Performance:</b> <b>920.00%</b>	<b>2004 Performance:</b> <b>721.97%</b>
<b>2003 Performance:</b> <b>790.32%</b>	<b>2002 Performance:</b> <b>490.32%</b>	<b>2001 Performance:</b> <b>620.14%</b>

## HERE'S HOW IT WORKS...

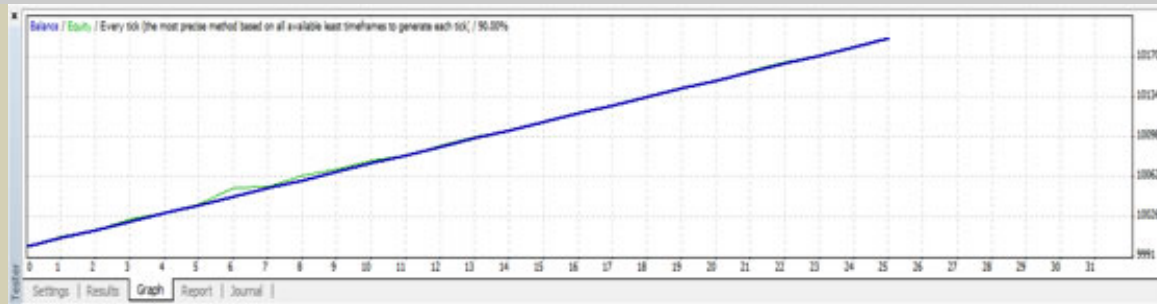

This is a 2008 Backtest of Ivybot

We are constantly scanning the market and when we see the markets changing, we modify our system, so rather than this happening...

You will continue to see this...

IvyBot is a proven system that has been trading the forex markets for over 9 years. Below is a summary from one of Byron's trading accounts.

IVYBOT INCLUDES THE MOST  
ADVANCED TRADING ALGORITHM  
EVER CREATED. IVYBOT UTILIZES  
MARKET KNOWLEDGE, ADVANCED  
MATHEMATICS, AND COMPUTER  
ENGINEERING TO CONSISTENTLY  
BEAT THE MARKETS

**NOTE:**

IVYBOT can Trade in  
any market condition, no  
matter the volatility,  
IVYBOT can extract  
profits.

The actual Ivybot system is a unique algorithm developed exclusively by the Ivybot team. The algorithm uses a special combination of the following variables: Trend analysis, weighted price action, technical price patterns, market liquidity, volatility, and forward projection scanning. This combination of parameters is fed into a structured Ivybot equation that allows the system to predict the futures with accuracy of 98%.

## LOOK WHAT IVYBOT DID TO THIS ACCOUNT IN JUST ONE MONTH.

Bars in test	3992	Ticks modelled	5979225
Mismatched charts errors	0		
Initial deposit	10000.00		
Total net profit	18400.00	Gross profit	26140.00
Profit factor	3.38	Expected payoff	876.19
Absolute drawdown	840.00	Maximal drawdown	6340.00 (21.70%)
Total trades	21	Short positions (won %)	14 (78.57%)
		Profit trades (% of total)	15 (71.43%)
	Largest	profit trade	2000.00
	Average	profit trade	1742.67
	Maximum	consecutive wins (profit in money)	6 (12000.00)
	Maximal	consecutive profit (count of wins)	12000.00 (6)
	Average	consecutive wins	3

And remember, there are THREE more currency pairs and this trading system is constantly updated to give you the latest trading systems.

# It is about action!

Not everything in life works, but if you want the life I have you need to do something about it. The truth is you need to work smart or actually "work" is a bad word... You need to take smart actions. I remember my father... bless his heart, he worked 15 hours a day six days a week with his own driveway paving company. He worked really hard his whole life to support his family and was a "business owner". By the age of 28 I had already made more than he did in a lifetime by taking smart actions and learning about trading.

## We have done all of the work.

We have worked our entire adult life perfecting the ultimate money making machine. You do not need to work hard again! You need to work smarter, not harder. With IvyBot, there is nothing new for you to learn, only opportunity to help you earn. You do not need to learn anything. This is the opportunity you have been waiting for. We assure it.

Check out these live account results! It is all about a better life for you and your family.

...without working at all, without going to the office, without hating your job... 100% automated... with absolutely NO human intervention.

Well, that's not accurate because you have heard our story.

Look, there is nothing wrong with working hard. My parents worked 15 hours a day for over 30 years and I am truly grateful and respectful of that sacrifice. They did everything they could to support our family, just like many of my closest friends and their families do today. Costs go up, paychecks get stretched and at the end of the day you might be lucky to break even.

But the REAL difference between my parents, YOU and ME, is that they didn't have an alternate option. My parents are sitting pretty in retirement today, not because of their life's labor but because of IvyBot. This is the opportunity of a lifetime, so do not miss out.

**“ Travel, Sleep, Have fun...  
While you generate 10,000,  
50,000 or even 100,000! ”**

Today we are very rich from trading, not selling robots. We spend more time considering which Caribbean Island to take the family to than about watching the markets. With everything being automated, I sometimes go days without checking in on my account and do not waste one moment on worrying.

Even if you have never heard anything about Forex before, that is ok. As we have said throughout our site this is all very **SIMPLE**.

We all understand what a dollar is, what we can and cannot buy for a dollar. The same goes for someone across the world using Euros or Yen. The Forex market, also known as the Foreign Exchange Market, is the place where those different currencies change in price, where one day you can get 1.245 euro for every dollar, and the next day that changes.

The IvyBot was created to be able to predict those price changes on a daily basis. The advantages of trading Forex are obvious:

- ✓ **Low Startup** – Start with as little as \$50!
- ✓ **Huge Market** - \$3 TRILLION traded around the world every day (The Forex market is actually bigger than ALL the world's stock, bond, and futures markets combined! They don't mention that on the 5 o'clock news)
- ✓ **24/6** – Non stop action, 24 hours a day 6 days per week (Sunday - Friday)
- ✓ **Low Cost** – While with stock trading, futures and options you pay spread plus commission, with Forex your only "cost of trade" is spread (that can add up to ALOT!)
- ✓ **Up & Down** – Profit from rising and falling prices...it does not matter what way the market goes. Up, Down, Sideways, there are always opportunities to profit.
- ✓ **No Size Limit** – as BIG or as SMALL as you want!

## So How Did We Pull It Off?

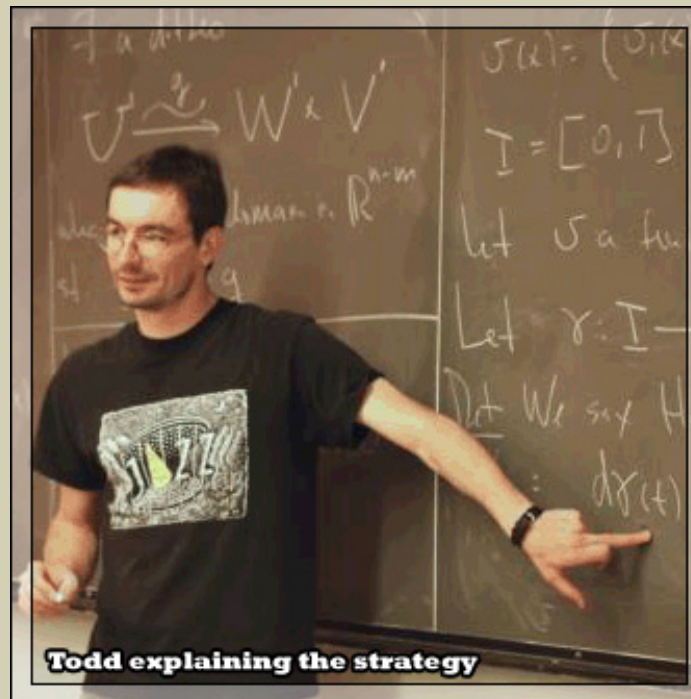

If you have seen the news within the last year, you would have noticed that the stock markets, and many other markets, have been all over the place. Up some days, but mostly down for the majority of the year. This is a daily occurrence. These markets move up and down all the time, and to the untrained eye it may look very confusing.

Through our extensive studies, we have learned that these market moves are actually very precise and have patterns to them. Their movements can be predicted through a variety of mathematical equations.

Prior to the internet, we had to make many of these calculations by hand every day. We used the strategy within a variety of markets, but once systems become available to program strategies, we were one of the first to begin using them.

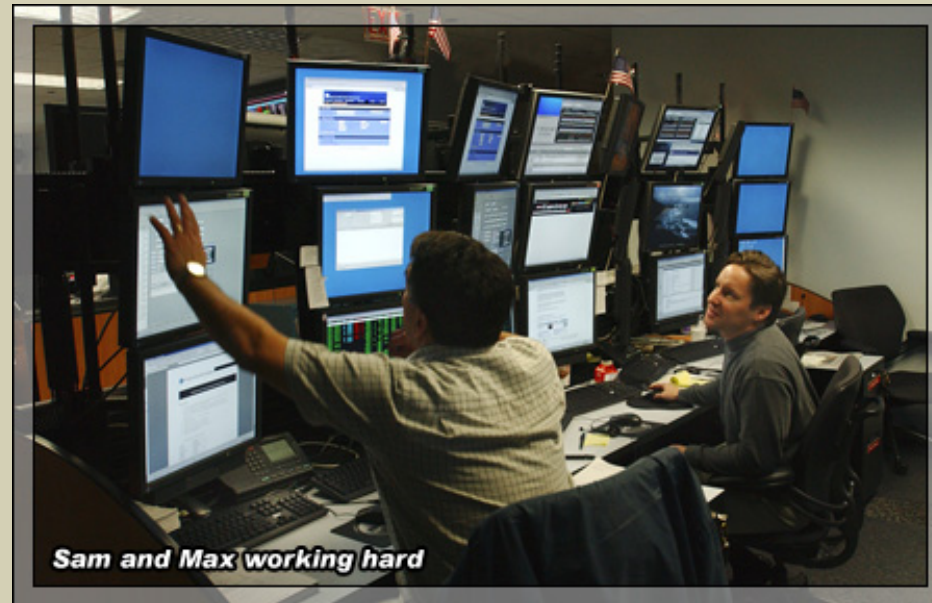

Our team consisted of a variety of specialists. I would consider myself the leader, making sure that everyone was working together to get the most income. Two of our other team members, John and Todd, were the mathematic geniuses. They came up with the strategy, the formulas, and are the true masterminds behind the IvyBot.

They may be the smartest guys I have ever met.

We also worked with two computer geniuses, Sam and Max, who helped program the complex formulas into the Metatrader platform. Metatrader is the best automated trading platform on the

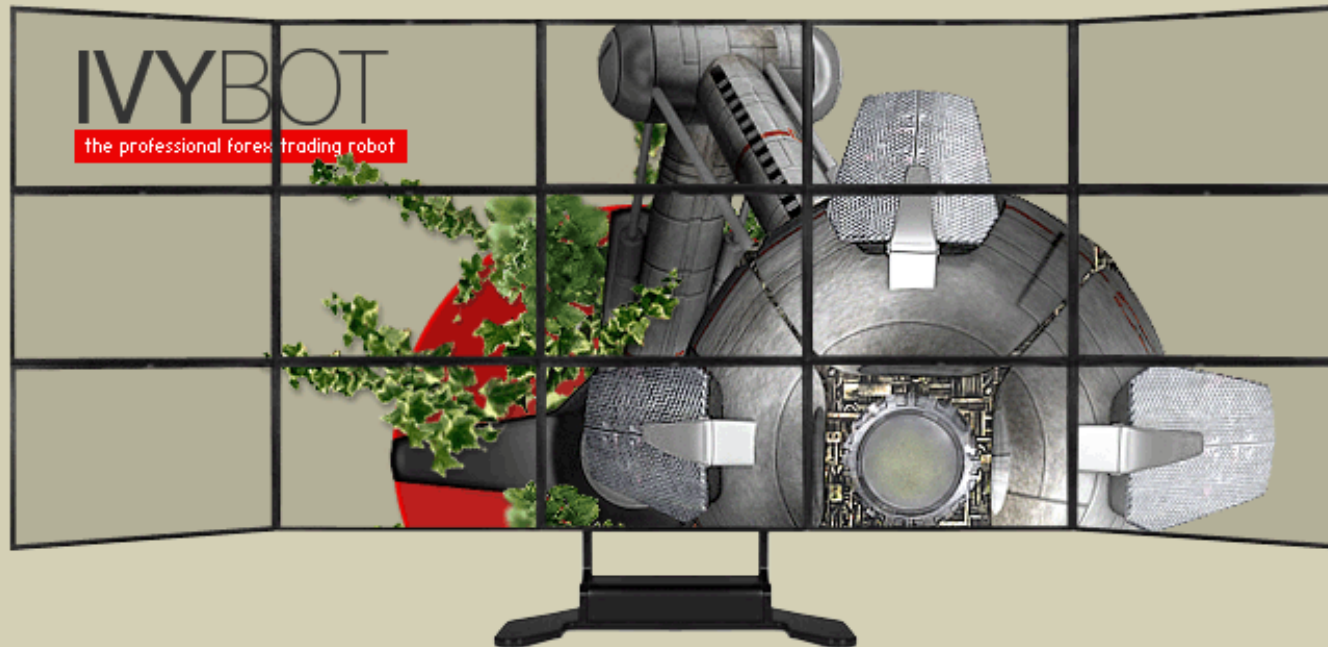

market. Both of them are accomplished programmers, and many of their systems have been highly touted at the world's largest trading competitions.

Our 5 member team still stays in contact everyday when we are trading the markets. Our manual trading has all been automated, so we only glance at them every so often.

Purchase the IvyBot and join our team. We can all make money together!

## **What do the experts have to say?**

Prior to releasing the IvyBot we wanted to get the opinions of some the industry's top investment companies. These professionals have traded a variety of markets throughout their lifetime.

They were given a beta version of the IvyBot for 30 Days and after testing the system we sat down and discussed what changes could be made.

**This is what they had to say...**

## Jeremy Friedman, Autotrade Pros LLC

Jeremy Friedman, a software designer, is best known as the co-creator of the professional trading systems used by many of the top asset management institutions.. Moreover, throughout his career he has been creating products that explore new metaphors, sometimes with far-reaching consequences. In addition to the selling systems, he helped develop one of the top performing trading systems on the market. His products have proven to be catalysts that had major impacts on the growth of the electronic trading.

Listen to what Jeremy had to say below.

## Gary Gilmore, GG Trading

Gary Gilmore has been trading since the early 80's. He began his career working as a broker in Chicago. His specialty was foreign exchange futures. When the spot market became more mainstream, with the availability of technology, he took his keen trading knowledge to the screen. He ran his own trading desk for more than 9 years, concentrating on the Forex market, specializing in trading the Euro and Pound. Since, he has moved business overseas and now manages his own fund, but as any trader, he is constantly observing the market.

Listen to what Gary had to say below.

## Jeff Turnblom, Trading Global Inc.

Jeff has been a full-time day trader for several years. He trades futures, options, stocks, and currencies on European, US, and Asian markets every trading day (five days a week). He has experience analyzing various markets, and regularly creates new trading systems for day trading and swing trading. Jeff is also an experienced computer programmer, and has written a variety of day trading related software, including charting, market analysis, trade analysis, automatic trading, and order entry systems.

Listen to what Jeff had to say below.

We actually released the Robot to a select group of people... we wanted to make sure that we were not the only ones who felt the IvyBot was a simple money making solution.

We wanted normal people, people without any trading or computer experience, to test our system and attest to our claims.

Well... take a look at what Mike had to say:

Look what others are saying about the IvyBot™

## What about the 2008 Financial Crisis?

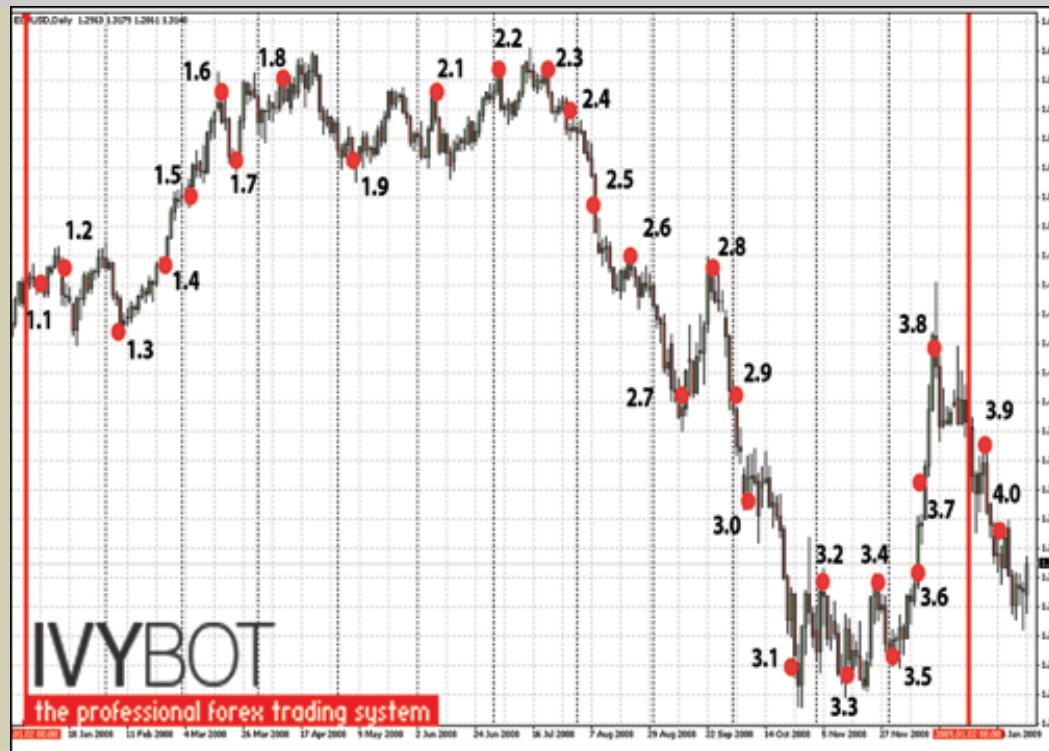

The IvyBot trading Robot is built to make money no matter which way the market turns. The wild 2008-year actually helped us make more money. While many of the other systems were blowing out accounts, the IvyBot team was actively adjusting the system to the most current market conditions.

## Why?

The sole reason IvyBot can profit in any market is because it is constantly being updated to meet the most current market conditions. If there are major changes in what is taking place in the world, the IvyBot team is there, programming the system to react to these new changes. The system has been updated more than 50 times during the heart of the financial crisis. The unseen 2008 market moves were catastrophic to most financial firms, because they continued to use the systems of the past.

IvyBot came out with system improvements whenever there was a major change in the market. This chart illustrates the timeline of the changes made within the Euro throughout the 2008 Year.

As you know the stock market has lost quite a bit more then after September 11th 2001 in recent months. We must all admit that these are scary times. Ivybot has outperformed the stock market during the best of times and more importantly during the worst. We know Ivybot can not only help diversify portfolios but it can change lives.

**Remember how I told you how SIMPLE this is?**

Well, all you need is to know how to download a program (actually, most of that is also taken care for you!) and that's it! Downloading is a very simple process. Our instructional videos will guide you through the step by step process.

**Not comfortable with technology?**

We know that many people are not very good with computers. We have simplified everything for you and have preprogrammed everything! If you still do not understand it is ok we will help you.

**It is as SIMPLE as 1 - 2 - 3**

**1.**

### **Download IvyBot.**

You will instantly receive the expert advisor file for use with Metatrader.

**2.**

### **Install it on your computer.**

It is compatible with any Personal Computer.

**3.**

### **Collect Cash!**

Once its set up you can literally walk away. **That's right, just walk away!**

1.

DOWNLOAD IVYBOT

2.

INSTALL WITHIN MINUTES

3.

COLLECT CASH!

**LIVE LIFE, BE HAPPY AND MAKE MONEY.**

Billions of dollars are being made in the markets every day. The people that say money does not buy happiness are broke... sorry to be so straight forward, but it is the truth. As we have stated already it is about taking smart actions and not working harder.

Wouldn't it be nice to take vacations, go out to nice dinners and buy new cars whenever you want? All of this can be accomplished automatically with Ivybot. Ivybot even makes me money while I sleep! There are so many schemes out there on the Internet with very vague sales pitches and even worse products. All of the "make money from home" products are nothing more than a way for some unscrupulous "business" man to take your hard earned cash. Ivybot is simple and produces hard cash with no active participation on your part. We are also so confident in Ivybot that we are offering a 60 day 100% no questions asked money back guarantee.

Through comprehensive market research we discovered the optimum price point for Ivybot should be \$2,500 per month. Our research took into account many different factors such as target market, household income, internet reach, the economy as well as many other factors. We sat down and decided to throw out that research for now. Our biggest reason for reducing the price to \$300 per month was that it works just as well on all size accounts and why eliminate such a large portion of the population just so we can make a few more bucks.

The truth is we do not need the money and because IvyBot is new to the public I want to show EVERYONE that it is the absolute best robot on the market. I want the word to spread out as much as possible and I want to create a great name for Ivybot.

The special introductory onetime payment price of \$149.95 will be available **ONLY DURING THE LAUNCH PERIOD**. After that the IvyBot will be a recurring subscription product.

In other words, if you buy the IvyBot now you will only pay \$149.95 One Time and will never be charged again, ever. Opportunities like ivybot do not come along often so now is the time to take action.

You will enjoy ALL the benefits that people who buy the product after the launch at the new recurring billing pricing model will enjoy but for a fraction of the price... only **\$149.95 ONE TIME PAYMENT!**

**Download the IvyBot Today and qualify for the extra Bonuses. They are available for the first 1,000 IvyBot purchases.**

**Stop Waiting!!!**

**Your purchase will include these bonuses below.**

When you purchase the IvyBot trading robot we are also going to throw in the “Market Watch” custom indicator, independently valued at \$500, absolutely FREE. We have used this indicator for many years and felt that including it in the purchase of your IvyBot would increase trading results tremendously. This is an exclusive product, found nowhere else. We were planning on selling the indicator as a separate tool; however demand for IvyBot has been strong that a bonus felt right. We value our customers and feel that you deserve something exclusive that was made just for your order today.

The “Market Watch” indicator is a very simple indicator to follow. Just place it on your chart and follow the green and red lines. When the indicator shows a number of rising green bars, you know that the strength of the currency is rising. When the indicator shows a number of rising red bars, you know that the strength of the currency is falling. It's that simple, when you see green you buy, when you see red, you sell.

Get it today! We have decided to only release a limited amount of them, so they remain very valuable. Don't regret not purchasing the IvyBot because a deal like this does not come around very often. Get it while you can.

BONUS 2

# SESSION PROFILE

FREE INDICATOR!

## Session Profile

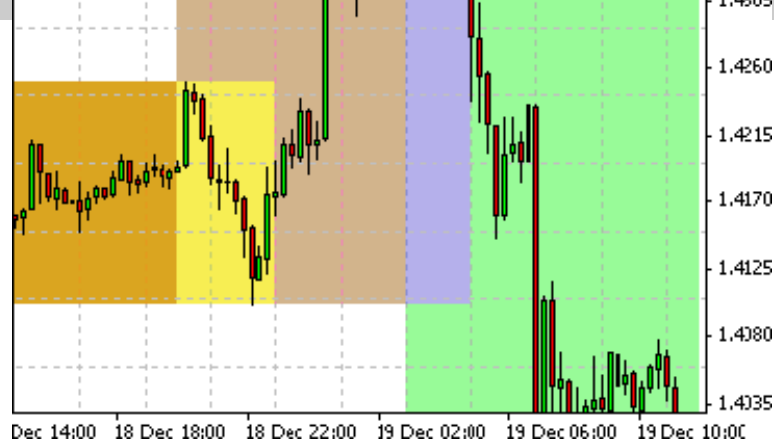

When you purchase the IvyBot trading robot, not only are you getting an amazing trading system, an incredible indicator, but we are also including an industry leading tool. It is called “Session Profile.” You will find this indicator used by the industries best and brightest traders. This product has been an industry secret for generations, and now as a member of our IvyBot community, you will be able to use it to increase your trading potential.

“Session Profile” will take your trading and technical analysis to a whole new level, allowing you to further monetize your forex success. This custom indicator is unlike anything in the market today.

The “Session Profile” indicator is also very simple to follow. Once placed on your chart, you will see three large boxes. They outline the different global trading sessions. You will be able to identify the open, close, high, and low of each of the three major global trading sessions: Asia, Europe, and Amercia.

Orange – Asia  
Brown – Europe  
Green – America

Get the industry's most comprehensive technical trading indicator today, and start making money like the pros do. This entire package is guaranteed to increase your knowledge of trading and the markets. Start making money today.

## GET YOUR \$500 Trading Bonus Today

If you purchase the IvyBot within the next 7 days you will qualify for a trading bonus. They are offering a credit trading bonus that will allow you to get up to \$500. (Terms & Conditions Apply)

**BONUS 4**

# LIFETIME MEMBERSHIP

## Lifetime Membership

Also included with your purchase of the IvyBot will be a lifetime membership to many of the future products we have in the works. We want you to succeed, and so as time changes, and the markets change, the robots will have to be adjusted to make sure that they can continue to sustain profitability.

This Membership is FREE.

You will have access to these wonderful services

Full Service Support for Life

Access to New Trading Indicators

Access to New Trading Robots

Access to Revised version of the Version

Knowing that you have a team here willing to help.

## MONEY BACK GUARANTEE

NO QUESTIONS ASKED

# 100% No Questions Asked Money Back Guarantee

It's simple...

You have seen a lot on this page.

You witnessed unheard of proof.

You saw what IvyBot is doing right now and how it's performing.

You now know this is the best Robot in the market.

BUT...

It doesn't matter what we think...how IvyBot is performing for us or other users... it only matters what YOU think!

If for ANY reason at all you feel IvyBot is not for you, just send us your trading screenshots (or call us...there is a support hotline available to clients) within the first 60 days after purchase for a complete no questions asked refund.

Best Regards,

*Byron Kingsley and the Team*

**Unfortunately we can NOT cope with the load of visitors.**

Due to this we have to change our pricing model back to \$ USD 450 after the next ~~100-46-27~~ copies are sold. We seriously apologize but the support team has to be fully staffed, the video and hosting costs shoot through the roof and we want to limit the purchases in order to provide the best support ever.

Take advantage of this Once In A Lifetime Opportunity at the special launch price of USD \$149.95. I suggest you act before the price is raised.

No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. Hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading.

All information on this website or any e-book or expert advisor purchased from this website is for educational purposes only and is not intended to provide financial advise. Any statements about profits or income, expressed or implied, does not represent a guarantee. Your actual trading may result in losses as no trading system is guaranteed. You accept full responsibilities for your actions, trades, profit or loss, and agree to hold ForexAutoPilot and any authorized distributors of this information harmless in any and all ways.

Your subscription or purchase of any IvyBot products serves as your acknowledgement and representation that you have read and understand these TERMS OF USE and that you agree to be bound by such TERMS OF USE ("Agreement").
