

Hi Guys;

Here are the final results for the year, trading EOD with ADX.

All pairs are given as a bar graph for the whole year and also a graph for the month running totals.

What I mean by running totals +/- is simply the actual result for any pair for any month is added or subtracted from the previous month running total and the new total is displayed.

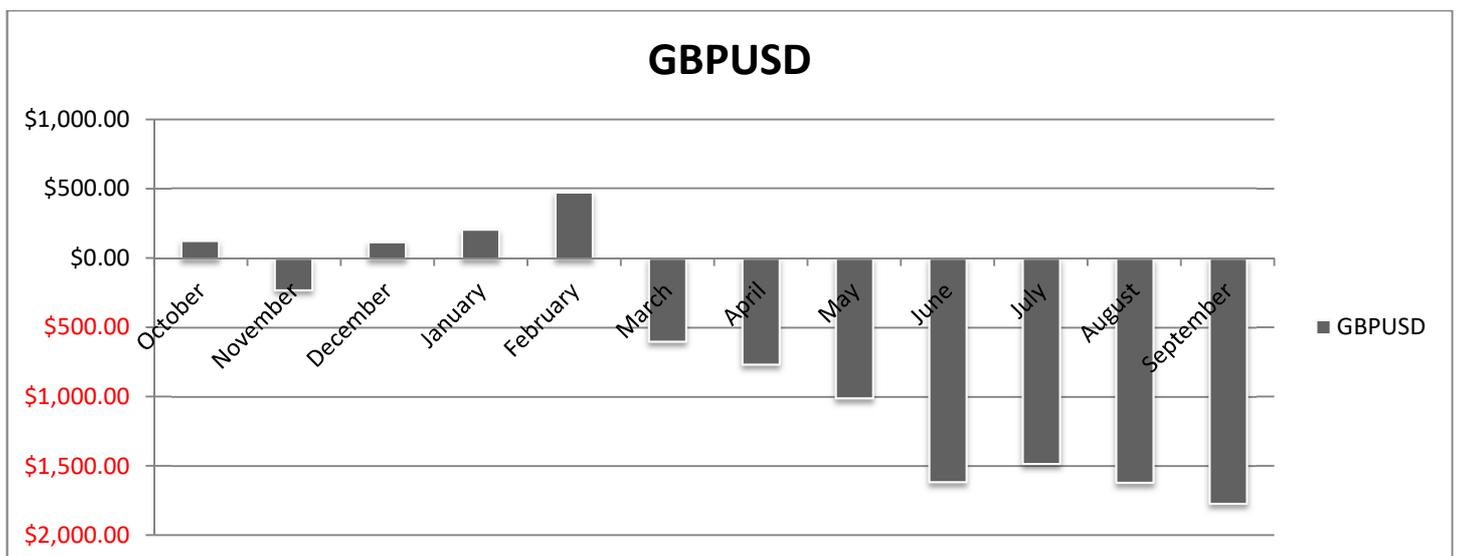

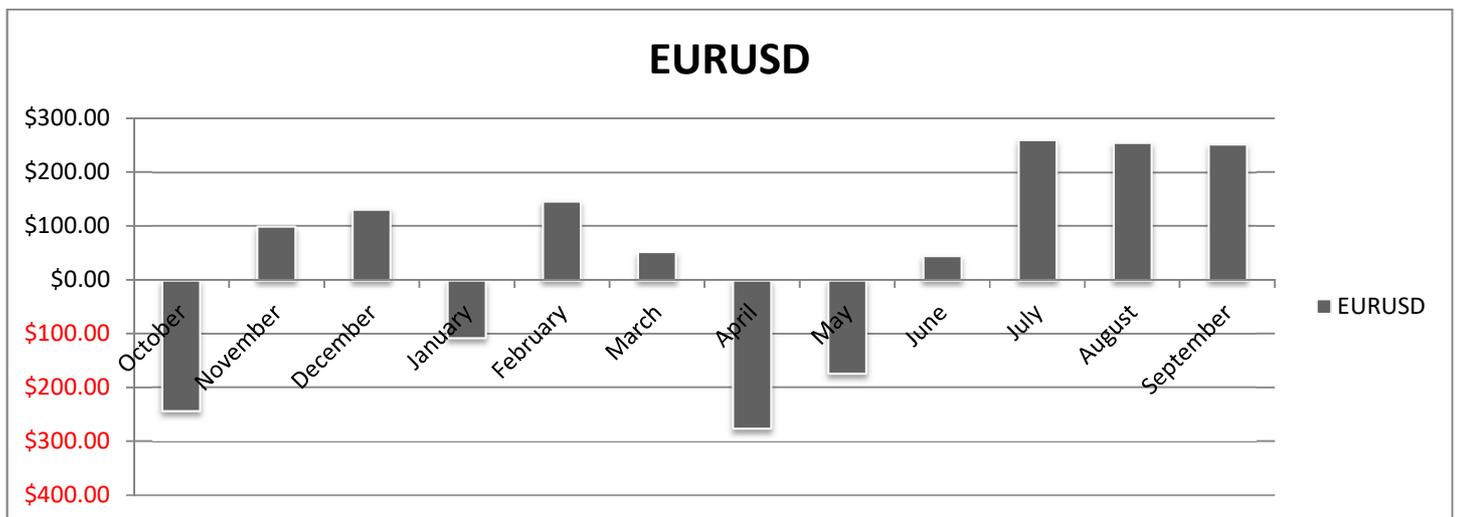

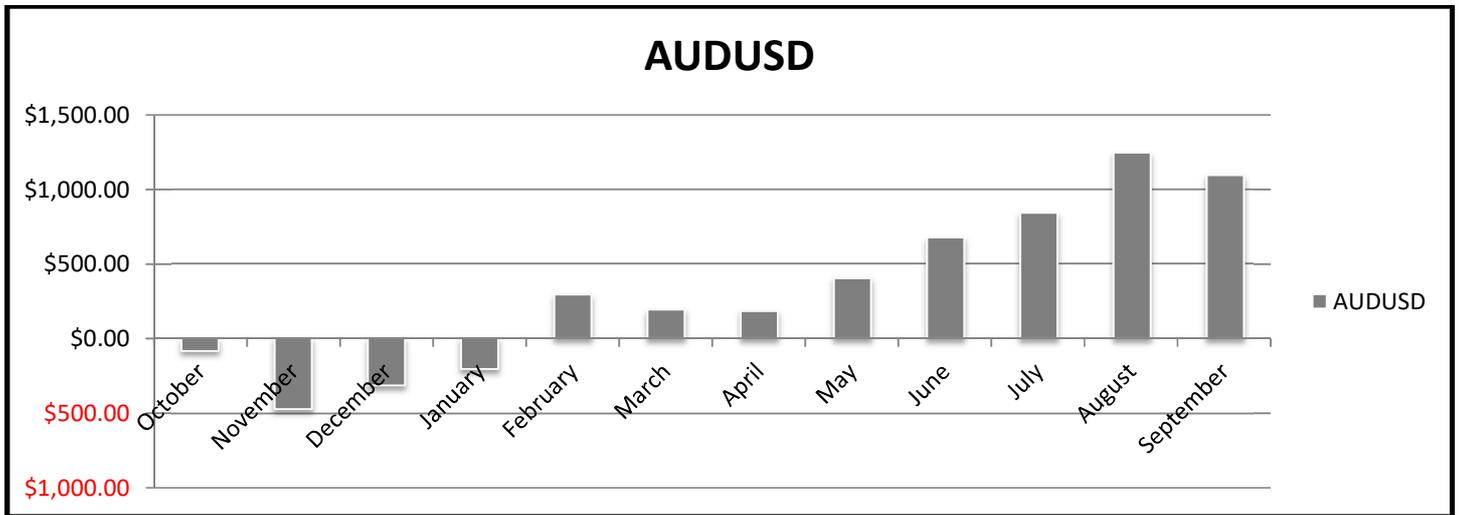

(for example, AUDUSD for October 2015 was -(\$86.00) then in November 2015 the actual result was -(\$383.00) so we subtract this amount (because it is a negative number) from the previous month and we get -(\$469.00). Then in December the actual result was \$157.00 so we add this to -(\$469.00) and we get -(\$312.00) Hope it makes sense, all graphs are in this style.

I will only be trading the pairs which showed positive results over the entire year as these are the ones I feel respond best to this strategy, I have to think that a year of data is a good base to make this kind of decision.

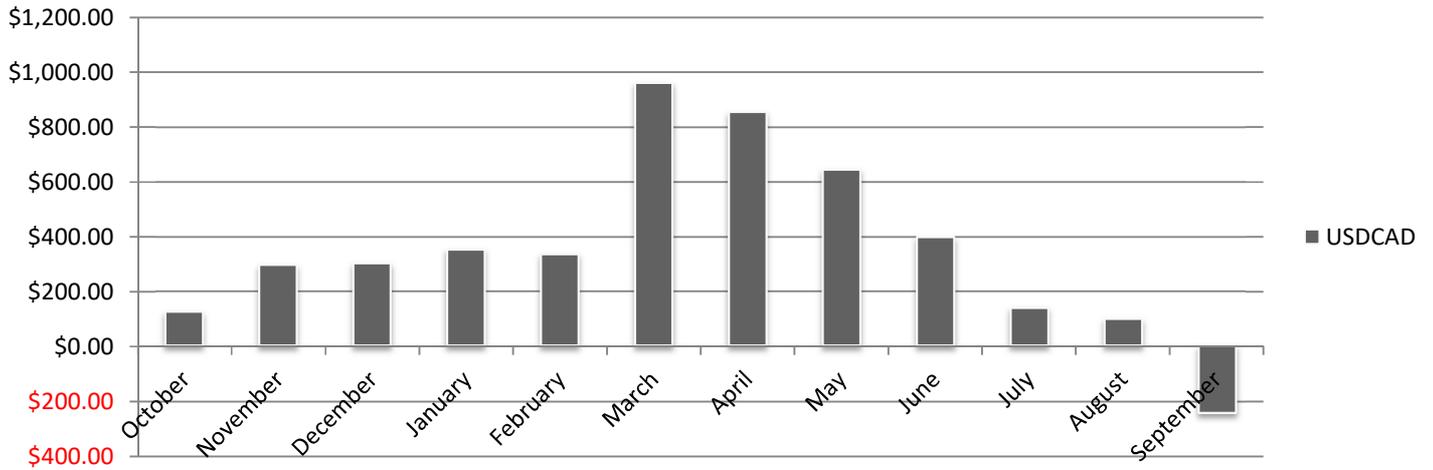

Here are the results for all pairs and at the bottom is the results for the months.

Running+/-	October	November	December	January	February	March	April	May	June	July	August	September
AUDUSD	\$86.00	\$469.00	\$312.00	\$205.00	\$295.00	\$195.00	\$185.00	\$405.00	\$675.00	\$845.00	\$1,245.00	\$1,095.00
