

### TradeMaker Performance Report; September 2009

How to interpret these performance figures:

-  A Winning Idea is one where the Entry is triggered (or a Market Order is placed) and, subsequently, the Target is hit.
-  A Losing Idea is one where the Entry is triggered (or a Market Order is placed) and, subsequently, the Stop-Loss is hit.
-  The Entry Price for a Market Order is the Bid/Offer at the time of publication.
-  The Average Idea Performance is the average return per idea ignoring any leverage.
-  For more information, please contact [Hugh Taggart](#).

NOTES:

- No consideration is made of what happened in the lapsed time between the Entry and Target or Stop being triggered. e.g., Trades that opened and were profitable before reversing to hit the Stop are considered Losing Ideas.
- Clients are responsible for the management of TradeMaker positions. Ideas are just that and should not be taken with the aim of leaving them untouched until the Stop or Target is hit. Clients should consider their particular circumstances and opinions to manage TradeMaker positions profitably.
