Hello, my name is Arthur! I create amazing technical indicators and expert advisors for the Metatrader platform, which help traders to increase their returns.

Metatrader Indicators
A technical indicators is a mathematical calculation based on historic price data aiming to forecast market direction.

Metatrader Expert Advisors
Expert Advisors (EAs) are automated trading systems programmed for the Metatrader platform.

Cashback Program
Get paid rebates to trade your own account using our forex cashback program. We work with top-notch brokers and pay up to 7\$ per round lot!

Forex Managed Funds
Invest with full-time professional traders at no initial cost, in exchange for a share of your profits. Reliable, transparent and cost efficient.

Dear

This is Arthur from **PZ Trading**, I hope my mail finds you well, in good health and making steady profits.

The purpose of this message is to let you know that I have released a free **Pyramiding EA**, which will amplify the profits of your correct trading decisions, by using unrealized profits from successful trades as margin for new ones.

Pyramiding is a very smart way of extracting the most out of your winning trades, without risking your original equity. **Download the EA for free today!**

Make the most out of your winning trades!

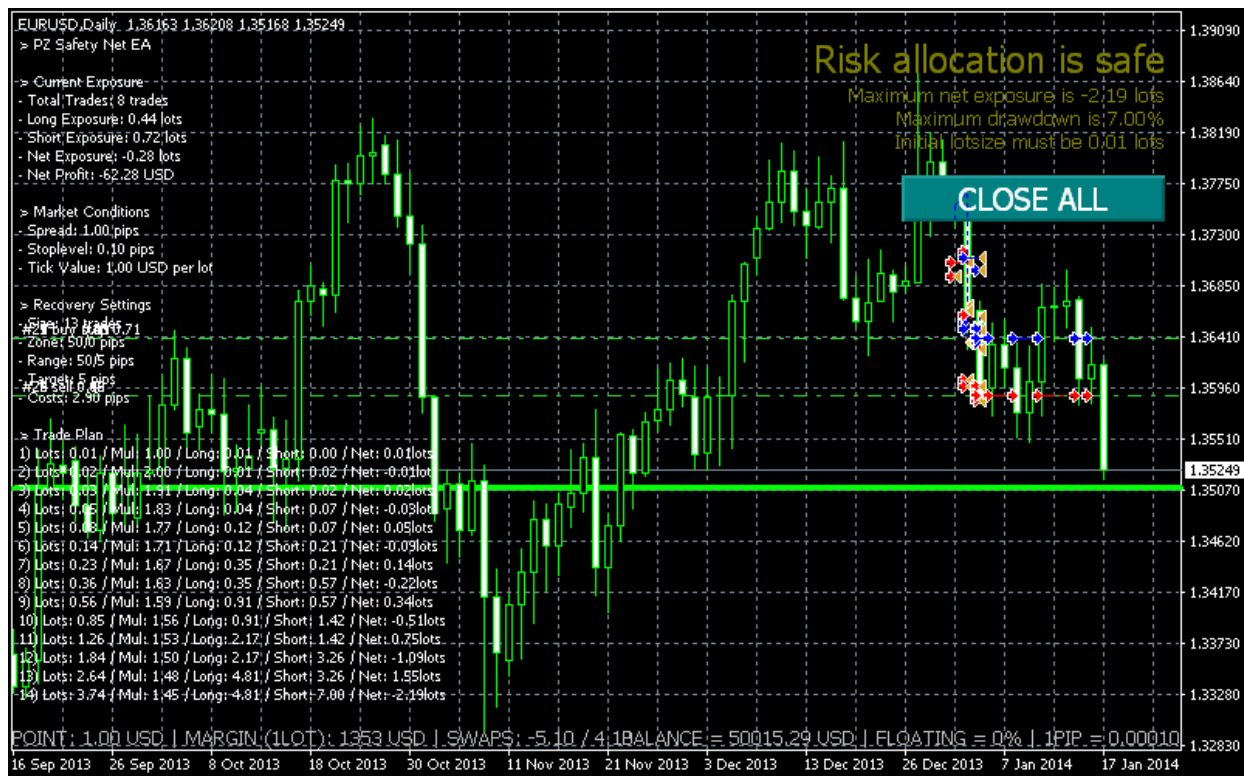

The **Pyramid EA** works very much as you'd expect. The behavior of the EA is fully configurable and the strategy is timeframe independent. It supports bidirectional trading and takes random trades in backtests so risk settings can be tested. To trade on a live chart, follow these steps:

- Load the EA to the chart
- Select amount of trades, spacing and pyramiding behavior
- Enter stop-loss and take-profit in inputs (as % of balance)
- Take the initial trade manually
- Let the EA take care of the rest

And of course it is completely free for my subscribers and visitors ;-)

Safety Net EA has been recently updated

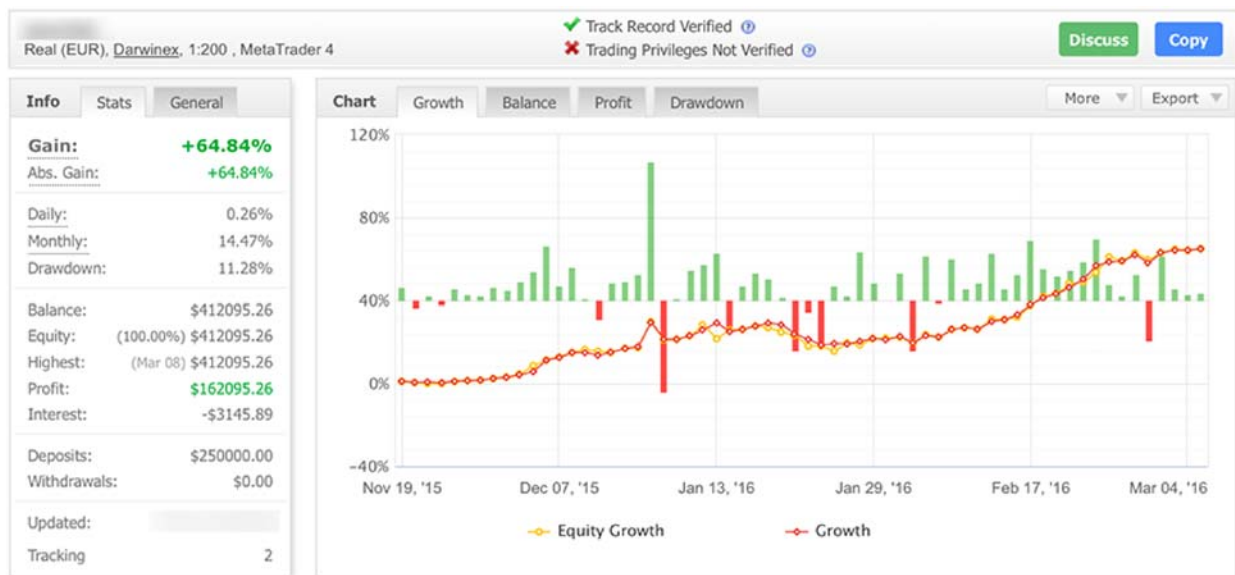

In other news, the **Safety Net EA** has been updated to version 6.0, with major improvements in usage and safety. If you unfamiliar with it, it is a complete position management expert advisor, which provides you with a complete trading framework and methodology which delivers constant profits inside a predefined risk allocation.

If your trade is correct, the EA will apply a break-even and a trailing-stop, letting profits run. If on the other hand, the trade goes straight into red, the EA will recover the losses applying an unique imbalanced hedging methodology.

This EA is my best selling trading tool, and 95% of users are very happy with it and making constant profits. Feedback from customers could not be better, the EA has been improved and tuned based on feedback for several months.

Trading results

The above MyFxbook trading results belong to a happy customer who wishes to remain anonymous. This particular trader made a whopping 162,095\$ in profits in the last six months, using **Safety Net EA**.

If you are looking for a market edge you can trust, try the **Safety Net EA** today and you won't be dissatisfied.

Use the 25% discount!

Fashionably, subscribers such as yourself can benefit from a 25% discount when purchasing any of my trading tools. A lot of them have been updated lately including a multi-symbol and multi-timeframe scanner which you might find interesting.

The 25% discount code is **RegularCustomer**
Enter it in the order form

That's it for today! Feel free to reply to this email if you have any questions.

Thanks for your time and have a great weekend!
- Arthur
