Risk Disclosure

There is great risk trading in the forex market. You should always use funds you can afford to lose no matter how good the trading tool, EA or system you are using. Loss and even total loss can happen

The forex trading EA you have here is of high-quality but can be abused or misused by individuals causing the possibility for error. It's important to understand what you are using and to make your own assessment on how you want to proceed in your trading.

I AM NOT YOUR FINANCIAL ADVISOR. You are free to make your own choices with the information I have available to you.

Be safe and responsible.

Simulated Performance

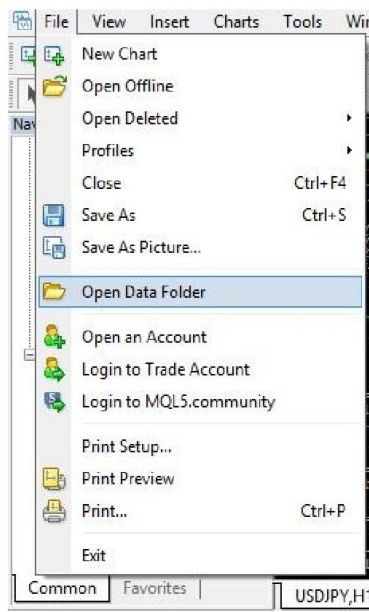

CFTC RULE 4.41 - Hypothetical or simulated performance results have certain inherent limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have under- or over-compensated

for the impact, if any, of certain market factors, such as lack of liquidity. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown.

You should be aware that trading Foreign Exchange carries a high level of risk, and you can lose some or all of your investment. The high degree of leverage that is often obtainable in forex trading, can work against you as well as for you. The use of leverage can lead to large losses as well as large gains. You must be aware of the risks and be willing to accept them in order to invest in the forex markets. Don't trade with money you can't afford to lose. We will not be liable or responsible for any loss or damage due to any reason. By using the BlastBands Expert advisor, you acknowledge that you are familiar with these risks and that you are solely responsible for the outcomes of your decisions. We accept no liability whatsoever for any direct or consequential loss arising from the use of this product. It's to be noted carefully in this respect, that past results are not necessarily indicative of future performance.

NOTE!

Backtesting previous history in the Strategy Tester may show losses. Realize this isn't representative of REAL forex trading. It's crucial to understand that the BlastBands EA NEEDS ALL 3 RECOMMENDED TRADING PAIRS in order to trade properly! The Strategy Tester only allows the user to test one pair at a time which isn't representative of what the BlastBands EA is capable of.

It's recommended to forward test the BlastBands EA using the 3 pairs to fully get an idea of how it works and trades.

Best of luck and stay safe!
