Calandar

Tone of my canvas. Going into slow holiday summer days and range is pretty common and focus should be back exploiting this. USD may continue to decline continuing its corrections. Heavy news on GBP CAD USD and AUD. AUD may sharply decline specially against NZD after Tues.

Monday

GBP Manufacturing PMI could surprise everyone printing better than forecast if so GBP trajectory of going higher will find new wind.

USD-ISM Manufacturing PMI **58.2** **58.7**

forecast is red but could print worse since all that tariff issues may have had some effect.

What is ISM?

A country's economy is as strong as its supply chain. The Institute for Supply Management (ISM) measures the economic activity from both the manufacturing side as well as the service side. Formed in 1915, ISM is the first management institute in the

world with over 40,000 members in 90 countries. Since it can draw from information gathered from the surveying its large membership of purchasing managers, the ISM economic [news](#) releases are carefully watched by Forex traders around the world as a reliable guide to economic activity.

ISM publishes three surveys; manufacturing, construction, and services. Published on the first business day of the month, the ISM Purchasing Managers Index (PMI) is compiled from surveys of 400 manufacturing purchasing managers. These purchasing managers from different sectors represent five different fields; inventories and employment, speed of supplier deliveries, production level, and new orders from customers.

In addition, ISM construction PMI is released on the second business day of the month, followed by services on the third business day. Forex traders will look to these releases to determine the risks at any given time in the market.

Forex Market Impact

The Manufacturing and Non-manufacturing PMI's are big market movers. When these reports come out at 10:30 AM ET, currencies can become very volatile. Since these economic releases are based on the previous month's historical data gathered directly from industry professionals, Forex traders can determine if the US economy is expanding or contracting.

Forex traders will compare the previous month's number with the forecasted number that economists have published. If the released PMI number is better than the previous number and higher than the forecasted number, the US dollar tends to rally. This is where [fundamental](#) and technical analysis comes together to create a trade setup.

Manufacturing sector is roughly 12% of U.S. overall economic growth.

Tues

RBA rate expectation is same and I think AN could finally go into correction after Tues! I still have my shorts here. Nice level.

AUD-Retail Sales m/m **.3%** 0.4% red here will make AN going south more than likely!

AUD Trade Balance is positive forecast however retail sales in my opinion is more important!

GBP Construction PMI forecast is slightly green

Weds

GBP Services PMI 53.9 54.0 I anticipate green number here

Thurs

BOE Gov Carney Speaks could he surprise the market by hint of future rate hike? Yes

USD ADP Non-Farm Employment Change this number is often wrong so I usually don't take it seriously since real number is released next day.

ISM Non-Manufacturing PMI **58.3** 58.6 red forecast does not look good for USD bulls here.

Crude Oil Inventories if continued negative will be good for CAD
FOMC Meeting Minutes-I anticipate neutral tone here even dovish.

Friday

CAD-Employment Change

CAD-Trade Balance

CAD-Unemployment Rate

any above green numbers would be great for CAD specially relating to employment.

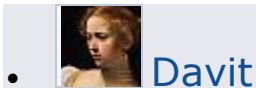

USD-Non-Farm Employment Change **200K** **223K** less then forecast will sent USD down quick!

Unemployment Rate-may move higher then 3.8 **notice unemployment claims are raising so something is not working.**

My overall trades are solid going into new week. Carrying over trades from last week still bearish on USD and commodity pairs very likely continue to gain and NZD may get a boost specially against AUD

Have fun! Make money!!

{quote} For this reason I kept my longs on NJ and NU, NJ is in good profit while NU caused some DD stil in the acceptable norms. Started building shorts in AU thinking that the some corection is imminent only hoping I didn't rush it..

not good idea to buy USD considering how OB it was and now going into correction. AUD may lose to NZD next week but still gain on Yen and USD

Notice calendar outline. Notice poor numbers on USD at least forecast numbers...

You have to look ahead that's what market does. Not saying your AU shorts may not work out but IMO we are heading 76+ specially if Feds keep rate unchanged on next meeting

Hi Davit, Thank you for this terrific thread. I started from the beginning and have read about 35 pages so far. A couple of questions: 1. How do you decide to set limit orders at a specific pivot vs. relying on price action to enter? Was it because of your 70 hour work week (do you still do that? BTW what do you do) or specific market conditions? 2. Regarding pa, do you look for a certain pattern, a break of a zone or just a strong push? 3. I really like the way you applied the concepts from the Bird Watching book. At that time you traded a few...

There should be complied version of key posts on clipboard.Yes I still trade certain pairs mostly same direction.I don't use limit orders.I work less now 30hrs a week.

have fun 🍷

Hi Davit, I've been reading this thread for a while without posting as I'm still learning. So just going to post the trade I just closed and ask about the exit. When you are winning, do you normally exit the trade solely because of price action or the area such as pivot point or S/R levels

or TDI hook or turn. Again thank you so much for all the education you have provided means heaps to the community and myself! Ken {image}

I probably answered this dozen times here and it gets tedious

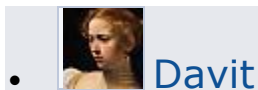

Yes PA/Yes Pivots/Yes Anglator
welcome

By all means look at the Calendar this is not TMS. Doing Calendar events is a requirement You can stay in the dark forever as an amateur or get smarter and actually develop awareness of the market beat.

This should be on News at FF but its not.Its big

<https://www.marketwatch.com/story/ca...ods-2018-07-01>

Canada begins imposing tariffs on \$12.6 billion of U.S. goods

"Canada on Sunday began imposing tariffs on \$12.6 billion worth of American goods like ketchup, pizza and iron in a tit-for-tat retaliation for President Donald Trump's slapping fines on steel and aluminum imported into the United States, according to reports. Trump placed the 25% tax on steel and 10 percent on aluminum on June 1 against American allies Canada, Mexico and the European Union."

This is not good for US jobs and Economy Canada is 2nd largest trading partner.Less goods sold more jobs get cut...this is economy 101

I was listening NPR earlier today and on the subject Canadians were vowing to stop buying US goods.This is not good at all.

There is good number of Canadian traders on this thread feel free to chip in the situation.

Agreed NOT GOOD!. The company I work for supplies Aluminum Door Leafs & Storefront framing to the Glass trade(Commercial side only, not Residential). We fabricate extrusions that are made in the USA that in turn buy raw/recycled Aluminum from Canada. We supply Local here in BC, small amount to Alberta & Washington State. Tariffs? Go Figure... its a pissing match.

We just received a larger than normal order from the USA to save the 10%, which we will have to start charging our customers more, as well they will pass on to theirs. Keep in mind we buy materials in USD & sell CAD. There is one extrusion plant we deal with in Alberta that has some of our dies. not all. An alternative that may force the owners hand to stay competitive or have an edge is to buy the extrusions from India. This would involve longer supply times, larger orders, more storage and having ALL our dies made (aprox 50). Dies are aprox \$1000 -\$1500 depending on shape, etc.

As well, note our local population, albeit small comparatively to USA cities, has a huge diversified culture. Mostly East Indian & Chinese, Filipino, Japanese etc. And since the 2010 Olympics I have noticed more Europeans (all parts of Europe). I just have to keep my ears open in the local grocery stores to hear the different languages spoken. Our cost of living is among the highest & I just don't know how the young in their 20's will ever save enough to own their own home.? let alone live day to day. Rent is 50-70% of some peoples monthly income. We have booming local economy going here right now & for the the past decade...skilled trades are needed mostly, as well other industries are looking to hire. Signs "for hire" are abundant. Wages suck comparative to cost of living. What the heck are the newly needed immigrants going to do? hope they have lots \$\$\$ when they land. Some do, some don't.

Considering the USA is our closest trade partner, as well US companies are here doing business...watch out for China...they love it here...quietly taking all they can get...What the heck are our politicians thinking? thinking for themselves it appears...and the pissing match will continue.

I'm not politically motivated, but do vote...blindly. I predict more foreign trade with Euro,Asia, Mexico & less w/USA to come in the near future. So sad, too bad for USA.

Hope this works it way out for the better of all.

I am fortunate enough to live here and be close to retirement (hopefully 5-10 yrs working)...working hard to make it less, thus is why I am determined to be a consistent profitable trader and will trade for a living. Thanks to all on this thread. My rant is over...onward & upward...

Cheers All,

Axleman.

EN is almost about to encounter massive weekly resistance. Perhaps a good time to start watching this pair. {image}

All resistance (like records) were made to be broken.

The thing to ask ourselves here is: Have the fundamentals on NZD changed to make it much weaker, or just weaker?

Hi guys
Those who are in DD on AN may get break tonight.Its already heading south

don't expect much bear action here. Fundamentals are weak on NZ

NZ dollar dips back below 67 US cents on weak business confidence
<https://www.nzherald.co.nz/business/...ectid=12082495>

bigger trajectory is NZ has peaked its growth and now basically sliding.

The stupidity I read here daily is amazing to me! I just know only handful of people here on this thread will succeed and that's true in the industry as well. Ask yourself what does this small minority of traders doing things differently. Same system same rules! Example Voty whom I dearly love struggles and been struggling for years and Mr Aussie is kicking ass. You find the difference! Read Mr Aussie posts and study him. You might just be amazed that he simply is applying the system! That's the key following instruction, rules! Some can't apply even if you present to them on silver plate....

Starting my month with a loss! My critics often accuse me of not taking losses and only posting winners. Not the case I manage my trades and when I see trades don't work I bail out! Does this mean I am discouraged? Not even tiny bit. My confidence shaken? Not at all. All this means I got firm hold how I manage my

trades!Cost of doing business one can't be right all the time I just need to be right enough to make profit!Over series of trades!

If you have all the important and necessary tools for your journey there are fewer surprises on your way ahead. If you have been using those tools before you will know which one to use when you get in trouble or when others are lost or waiting for someone to give them a hand, Forex is no different.

Do you know what's coming ahead of you, Are you prepared?

Attached Image (click to enlarge)

If you are not already in trades from past weeks, be patient. And if you are already in one or few trades then you know how to manage them based on what's coming in next 2 days.

Have your watchlist ready. Yours may be totally different than your friends but that is the name of the game. No two people see the chart the same way. If you see a support may be the other person see it as resistance. But when you have pivots laid on your charts and you have a plan, you will be patient. Don't be impatient when the news comes out and try to pull the trigger with heavy position size. **Start small, absorb the news, build the small positions and where others got stopped out and blaming news spikes you will see your trades turning into profits.**

holding still after build up a bit... secured and relaxed 🍷 {image}

I was just posting about EA what a lovely set up it was. I just don't like over trading....recipe for disaster. I must always assess my risk instead of profits.

You must know when to stop. Have comfortable margin so you don't panic and make decisions that may be detrimental to your account. Reason I can take 500 loss and be calm because I know my system works. Just need to relax and apply.

As anyone who has enough screen time notices certain patterns. Market makers love pushing price to the edges usually past typical places where average trader places Stops like 20pips above/below major S/R level or around number or key 200MA above below etc.

If you think your stops are not targeted you are being naive. Market is designed to separate you from your cash.

The way I set up this system is by passing this typical mine fields and basically trading with MM and taking their punches at times but not getting knocked out because we keep reserve energy always. Example from yesterday MM pushed AN all the way to 991 basically assuring stops were taken then flipped side and now going into correction. This happens just about every pair. I am sure some panicked and took the painful loss and I did advise here take 25% loss and wait. Point of my post is trust pivots and trust yourself doing the right thing.

Example of typical spike targeted to hit stops then unloaded opposite orders. There is a logic behind this. Big institutional traders can't get in

any time they want market must have liquidity to observe their orders hence hitting stops creates the liquidity and they get their orders filled. This is why I never afraid of spikes because majority of times they are fakes specially around pivot zone!

Bounce on UJ likely but this baby wont stay up long.With nervous market about Trump tariffs Yen is a safe heaven.Just need to be smart when to hit otherwise prolong holding will cost too much on swap.
Use zigzag tool to accurately hit the ends.I use this tool a lot

NDZUSD - closed, +420 pts (pa, angelator flat)

better take TP then be in DD or get stopped out with tiny gains. NFP week and that could be a wild horse.

<https://www.bloomberg.com/news/artic...zuela-invasion>

pretty wild...If true this is unsettling.

Can't be worse then Obama bombing Libya and taking out Qaddafi and making the country a shit hole green posture land now for terrorism Liberals hate facing their former presidents shit decisions.

Because of that decision destabilizing Libya later we had flood of north Africans crossing Mediterranean to EU and stressing EU more then already stressful situation.Now average Libyan is in shit conditions. Under Qaddafi Libya had free education,free healthcare and relatively prosperous population and even free housing in lot of cases.Look it up that country should of never been bombed!

It lasted 10 min. Talk about premature removal. LOL {image}

Its tough running a thread.If I don't remove offenders this thread would become most threads when few know what's going on because just about every poster has shit load of indicators and few follow instruction.

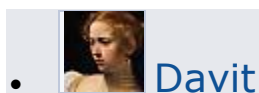

I learned one thing that people are ignorant even when I have it in bold orange on 1st page still people ignore it because they are used to shit threads where nobody enforces anything.**Its a revelation to them that I enforce what I have on 1st page!Usually after the fact when its too late...**

Couple of key red numbers today and if Trump continues his trade wars this may become more frequent.
This does not make USD bulls confident which is inline with my trade trajectory mostly selling OB USD

Attached Image (click to enlarge)

8:15am	USD	🇺🇸	ADP Non-Farm Employment Change	📁	177K	190K

about lot sizes.I have almost 80k and still trade mico lots 00.50-00.6-00.7 and max 00.8 but average .5

I can easily trade full lots with 80k but I don't.If you must ask why then you should not be here.Read the thread.

Almost everything taught by traditional trading books about lot sizes SL's are in my opinion wrong.If using traditional methods 95% traders fail then obviously something is wrong there and this thread illuminates new fresh way to trade outside the box.If you stops are 20-50pips you will be taken out its not If its almost assured.

This method is about net fishing wider net bigger harvest.Its lot more efficient then harpooning fish underwater.

Truly inspirational. 💰🍀🏆

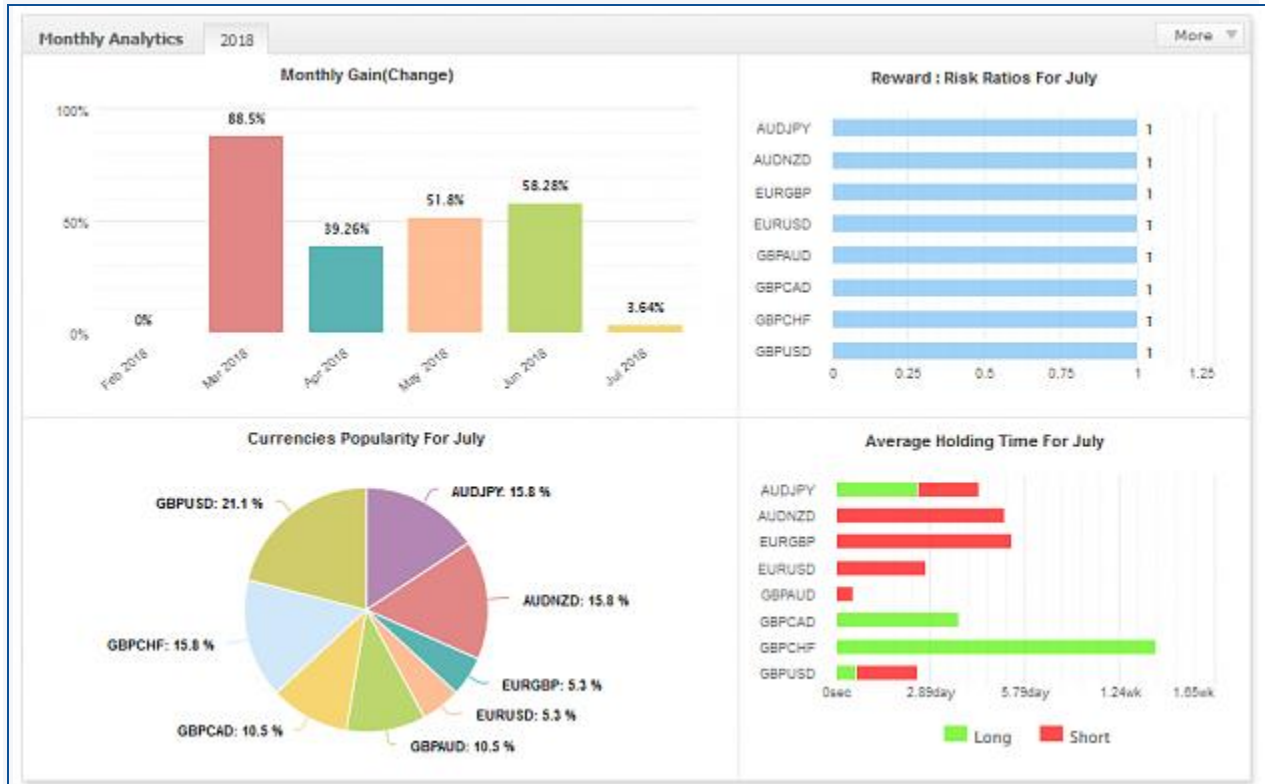

Roughly two years ago I stumbled upon your thread, put the template on a demo account and traded for a while. I didn't have much conviction, didn't believe on the method. I didn't pursue much further.

File 27 - Davit's Posts on his Pivot Trading thread-2018-07 Pages - 76

This year Feb, I had another look at the thread. Read little serious, and started to see the value. Opened a new account and followed the strategy whole heartedly. Results after 4moths +1week & 700 trades. By far the most stress free, safe and profitable strategy in my arsenal.

Thank you.

Since I have time now going to do my calendar events next week. Looks real good

Still short on UC long on NU AU GU

Next week only red news on USD is on Thurs rather light on USD and I believe USD corrections will continue.

EG still can't break above 8850 and I think this is heading south. Something to watch next week.

Monday

ECB President Draghi Speaks-Could he change his tune? rate hike 2019 summer to earlier date? Anything is possible from Mario

This and Monetary Policy Meeting could of been the reasons why Euro crosses specially EJ EN EA did not collapse Friday. They could after his speech depending on content.

Tues

GBP GDP m/m ?

GBP GDP Manufacturing Production m/m 1.0% -1.4% **green here/ could print lot greener if so EG is prime target drop below 88**

Weds

huge day for CAD make sure stick it on your PC and don't forget!

BOC Monetary Policy Report

BOC Rate Statement

BOC Press Conference

Overnight Rate 1.5 prediction Kind of overly optimistic since Canadian economy is not really heating up specially after trade wars with Trump.

Don't be surprised if the rate stays the same if so I think CAD will take a beating most possibly.

BOE Gov Carney Speaks -Little optimism from him can lift up the GBP perhaps hint on rates?

Thurs

ECB Monetary Policy Meeting Accounts

It's a detailed record of the ECB Governing Board's most recent meeting, providing in-depth insights into the economic conditions that influenced their decision on where to set interest rates. Wait and see the content and market reaction

USD CPI m/m

Core CPI m/m

Red here will solidify USD bears like myself.

Have fun and make 💰💰💰

{quote} Hello Davit , how long did you go to the balance 80 000 👍 ? My balance is now \$ 200 and I want to think how much to wait 😊

Took me 6yrs.Many hurdles and many challenges to overcome.

I did not start with 200! 200 account your challenge is not to blow your account.Don't worry about profits try everyday not to blow it.Your mindset is to survive and try to get better at trading money is by product of your skills and as such new traders taking 200 to 80k is almost impossible.You are obviously limited by margin so even adding 20-50 dollars a month will take serious time.

Again change your mindset from profits to getting better at this.Your task should be on learning to trade.Nobody is flawless and blowing up a tiny account with little experience is basically guaranteed.

good luck

{quote} Hi Davit, I'm subscribed to your thread, not because I use your system but because I do use weekly pivots in my trading and have done for a long time, they work for me. The reason I'm posting this over a wine on a Saturday afternoon sat in a not so sunny Queensland, Australia right now is because the flaming I see going on between a few people this last little while is the very reason I left the FF years ago. I'm not sure why I came back here, maybe boredom one day whilst looking at the calendar, no idea really but when I did return I found...

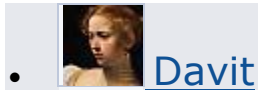

Thanks for your post.Agree being here at FF **is becoming harder** since obviously some guys violate FF rules and are tolerated and continue to post without any recourse.This is sadly the reality.

I have been getting nice PM's suggestions to go somewhere else and I am thinking about it.Have not made a decision yet but environment here is pretty toxic and only reason I am staying is because on this thread there are great traders that I like interacting and the reason of staying....

Thank you and best of luck 👍🍷

Hi Guys

I wrote serious Email to Twee regarding Ronda.This troll has threatened IRS on members and that's gone way too far.

Either Twee does his job that he was hired to do treating this place as a TRADING site and not 5th grade trolling site or I am going to stop posting here for good.

Which is it TWEE a trading site or trolling site!**Take a stand and actually do your JOB for a change!**

Not going to contribute here anymore as long as trolls like Ronda are permitted to post.That's just the principle.Threatening members with IRS is not to be taken lightly.

Thank you guys and I had a pleasure working with lot of you!Green journey!

Quoting Davit

Hi guys There are malicious individuals on this forum that want to bring harm to me.Published personal info that should of never happened. I for 2 years took time from my family friends to teach share a winning system and instead I get rewarded in most atrocious manner. It was a pleasure knowing you guys and you know who you are. I will be in touch with you guys if I go to another forum.Going to take a break from forum activity until maybe Sept.I am confident we can find a troll free forum. I will answer PM in due time there are lots of them...thank...

Davit and Scott you guys have been so kind to people and helped many to see the light through the tunnel. People who have been on Pivot trading for this long and read and

implemented Page 1 rules need no spoonfeeding and they may survive in forex if they keep on doing what they were doing until now.

Davit family comes first. All the online forums are alike no matter where you go. There are always unsuccessful people around who will try to take down the important person so that the whole thread can fall. **It would be naive of me to say don't think about the trolls and negative people because, to be honest, sometimes they can get so far in their trolling that it not only effects your trading but your health as well.**

Keep your chin up and feet steady into the ground brother and the bad time will pass. Karma will get to them who tried to harm you emotionally and Psychologically.

I won't be surprised if someone tries to make a website around this system and sell it to the newbies just like what happened to few of these threads.

1. Trading made simple

<https://www.forexfactory.com/showthread.php?t=291622>

Website selling memberships with sophisticated EA and signal service: <https://tradingmadesimple.com.au/>

2. Mr. Scott's Crayon Thread

<https://www.forexfactory.com/showthread.php?t=540420>

Website selling memberships with sophisticated harmonics software: <https://tradeempowered.com/> (Jason Stapleton)

Kindest regards

P.S. Please don't subscribe to me. I may not post too much on this thread after Davit is gone. Please keep your trade screenshots before/after.

{quote} It's probably best that it just dies off on its own. I got a message back from Twee and he couldn't care less about reigning in the toddlers. There's plenty of info contained in the thread already and it's not that complicated to understand.

Yeah oh well, it would be a shame for the thread to die off. I have never seen anyone work so hard to help so many with such comprehensive info.

The Christmas tree charts will begin appearing just like they did when Davit was here. With no one to warn/remove them, the thread's trading parameters will change just like it does on every other system thread that isn't moderated for relevant content.

If he finds another forum or starts his own, then it's FF loss.

It wouldn't need to be moderated in the same firm way Davit did (to be honest I thought he was unnecessarily abusive to some when they either just asked questions or ignored him due to his harsh tone with others), but a moderator will be necessary if you want to keep this thread relevant and clean of clutter.

Don't chase profits, let them sneak up on you...

{quote} Hello. Been lurking for a while and I will add my sad rant to those who mourn the end of this thread, or at least the departure of Davit, who seems to be a decent person, who has shared and helped a lot. Pity things have become so personal and it seems the main focus has been lost. I haven't tried the strategy live but it seems to me it is working although many people don't believe in pivots (and I admit I was among those), but I'm committed to study and learn more. Facts don't lie... @Retep Thanks for your mt5 indi, but to me it looks a...

Here's a MT5 template I set up recently.

Attached Image (click to enlarge)

The symbol changer and pip indicator you have to download from the market directly.

They are named:

Charts symbol changer and synchronizer MT5

[Quoting Davit](#)

Hi guys There are malicious individuals on this forum that want to bring harm to me. Published personal info that should of never happened. I for 2 years took time from my family friends to teach share a winning system and instead I get rewarded in most atrocious manner. It was a pleasure knowing you guys and you know who you are. I will be in touch with you guys if I go to another forum. Going to take a break from forum activity until maybe Sept. I am confident we can find a troll free forum. I will answer PM in due time there are lots of them...thank...

Davit,

Family is always first...and so is your health. Take a long sabbatical and rest, then please return to your grateful FF students. And, if you do return, please just drop any idiot that may be harmful this thread. I and others have learned so much from you, so maybe place a minimum for membership to this thread.

I hope to see you return after your rest. Maybe you paint more. Finally, sell me a painting - but, give a good price and of a female subject without being too graphic (LOL).

Your Friend and an appreciative student who shooting for 1 million dollars (USD) in 5 years using your Pivot Trading system !

All the Best.... John (aka G-Doc)

1) As price travels progressively away from weekly pivot it becomes more likely to go into correction.

2) 61 S/R key zone 78R/S is Scott Carney's last chance for reversal (spikes stops taken before reversal)

3) 100R/S another major zone. Should price smash 100 S/R then you are in strong trend supported by fundamentals.

don't subscribe to typical bookish mentality that if previous H4 is bear then assumption should be another bear candle. This is very wrong way to look at the markets. Markets are in constant motion and within 1 H4 candle price can move opposite over 100 pips against previous candle so it's not about previous candles but where price is in relative to pivots. In simple terms Location is what is important.

I trade 15-30min charts however bigger works as well.

TDI is our friend. When price hit major pivots we wait for TDI to turn thus confirm the move. Sharp angles important when its almost horizontal PA is weak or consolidating thus avoid trading. PA is king always!

STOP LOSS

- 1 Decide how much each swing is worth example \$500
2. Divide \$500 into mini lots for multiple entries example .50c a pip gives 1000 pip distance
3. This allows averaging in orders as seen fit irregardless if previous orders are in red
4. Orders are placed as long as reason for trade is still valid
5. If conditions change loss is taken since orders are not placed all at once this allows smaller loss

Swings

Each Swing investment \$500 (example yours could be anything)

Swing is taken as loss once -\$500 is reached

There are no exceptions. No running red beyond \$500

Orders broken down into mini lots that satisfies each swing consist of 10-15 trades

My budget for this is 2-3% of account risk say \$500 for example. I then enter trades on mini lots and as long as my 500 is not consumed on DD and I am still confident of my trade I stay on it. I may choose to get out early but most times my SL is predetermined. This allows me to cast a wider net. So my 10 mini lots can cover 50 pip distance hence capture better RR

There is advantage to trade this way. Should PA go against you and you no longer like the trade you can get out by fraction of lot invested hence your loss is minimal instead of traditional 1 trade 1 lot per trade when if wrong loss is substantially higher.

Numbers posted are for examples only

Note very important this system does not work best with hyper pairs that usually have over 120 pip ADR like GJ GA GN etc

From numerous trial and errors low ADR pairs fits the best in my method

Pairs I trade most often.....UC AC NC EA AU GU NU AN EU

{quote} My pivots are very similar to Oswell's. My broker is OANDA & I'm in the Eastern US timezone; same as Davit. {image}

Oanda will be going all their accounts to servers using European GMT+2 in September. Davit is aware of this as well. You can call them at 212-858-7650. As an EDT like you, I already transferred to the V2 server which uses the European time or GMT+2.

Thank you DrForexMD,

I had just gotten my charts set to where they was looking like Davit's when all the drama began to unfold...I had all indicators downloaded and was just working my way thru the readingI failed to copy/download page one and when it was removed thought that might be just my luckbut with these files you loaded i can browse thru them and continue to pursue this idea/system.

You are so welcomed. Just point anyone else to my pdfs.

And, let's stand up to these bad lurkers who can not do, so they just criticize.

If you or anyone else has there European GMT+2 Pivot set-up, please share it with me and others using EDT here.

Thanks ahead of time.

Please, anyone who wants to F*ck around here, come and F*ck with me. Davit has sacrificed so much to help others here !

I will find out who you are and I will follow you here on FF and let everyone know who are and what you are (an FF abuser). I am retired and published professional, who would have fun making you stay on FF miserable using the FF rules.

So, if you are a frustrated foolish individual, I will easily read it and describe you wherever you go on FF. Try me, b/c I protect my friends as I am from NEW York City and know how to handle idiots like you who want to show there as* here. Please try me. I have a personal journal here

at <https://www.forexfactory.com/showthread.php?t=643627&goto=lastpost> or here on Davit's Thread.

Come, I am waiting for you...I dare you, you miserable idiots.

So FU, and hope to see you soon, if you dare to show your low IQ and Personality Disorders, so I can make you a fool here or my Journal if only to protect others on FF!

Cryptosurf has been suspended.... FF has become LALA land.....

Do you know why? He was a big contributor here.

As for me, I was trying to protect others on this thread from the "malicious" trolls here who aggravated Davit. If I am suspended as well, I just want to say that I love you guys as friends on this FF thread, contributing and trying to keep Davit's Pivot Trading going.

Do keep it going as this Thread is extremely successful and you will make money if you follow Davit's rules !

Sincerely,
- John

Hi guys,

this is probably my last reply here on this thread, since Davit is gone and total chaos and disorder began.

Now the thread has:

- **no structure**
- **no rules**
- **many people posting in-valid charts with bullshit ideas**
- **a lot of skilful smart traders who stick to system has been suspended or left**

Thank you all for a great time here, some of you are incredible traders with great results.

Green journey

Cheers

Just my opinion for what it is worth ...

The people who have caused all this fracas here have the same attributes across the world and this behaviour is not unique to FF. They are basically attention seeking, they have very low self esteem and need to upset others (push their buttons) to feel good about themselves ... it is a deep psychological issue and according to studies the best way to deal with them is to totally ignore them ... they receive no gratification which they so desperately need and when ignored they don't get any sense of achievement, their lifelong failure is exacerbated and eventually they will go somewhere else where they do get what they so desperately need ... a reaction from someone. It is the **nature of the beast** and **getting angry or frustrated with them is exactly what they want and what they need (for an analogy ... it is their drug of choice)** ... because then they know that someone is "listening" or reading what they say and that is their only sense of satisfaction in their poor miserable life.

I actually feel sad for them because this minor disruption, one that will

be forgotten in a few weeks, is the only thing they can achieve from their entire miserable life ...

They are NOT worth anything, they have never achieved anything and they know it and it eats away at them!

In the words of the Godfather ... "forget about it!" ...

The best way I believe we can pay tribute to Davit is to carry on this thread the way he would like ... successfully, with dignity and maturity.

Well guys, i wanted to keep this thread going, but it seems it will die down like Genesis thread. Too much noise and no one to mod the forum. And FF admin are not helping at all with the drama that they did not nip in the bud when it first started. Will limit my posts and i can care less about the drama, my main goal is making pips and making money. Up nearly 7% this week and nearly 25% this month, all with Pivots.

I doubt there will be any successful new traders who will contribute anything substance to this thread, because it will get drowned by the chit-chat of dick measuring. Good luck to all and if Davit returns i would imagine all the great traders will return too (they are FAR BETTER THAN ME).

Update: Didnt want to make a new post..Look at that curve baby. **No WTO or WTU BS mumbo jumbo, no V**FX Thesis, no 400:1 Leverage BS, no 2000 bux for 2 years service, NONE OF IT, pure gains FROM A PROVEN SYSTEM!**

This thread is restricted to Red members only.
To preserve its integrity

For others if you are interested your answers are in the thread. It has been my experience that valuable information when given free often gets unappreciated because the user has no motivation to put work because he/she didn't bother to apply...since price of admission was free. I bet if you had paid 10k for a course you damn well would pay attention.

(just an example someone asked where paperclip was trading since 2016....and simple 1min search would of given this guy an answer but instead this guy posts a mundane, redundant post and taking time from others! and this person wants to become a trader.....folks you have no idea what hurdles you must jump over! get serious wake up!)

Mastering trading is like mastering anything else. Requires work!

[Mozart on how to unlock your inner creative genius](#)

The Myth Of 'The Creative Genius'

There is a destructive myth that the 'creative genius' is born with an innate, godlike ability to create extraordinary work at the snap of their finger.

This couldn't be further from the truth.

In a study into elite performance, researchers asked expert violinists from the Music Academy in West Berlin to keep detailed recordings of their daily practice regime for a week. (2)

At the end of the week, they analyzed the results — comparing the different forms of deliberate practice between the elite violinists and the less accomplished performers.

What they discovered was astonishing.

On average, the violinists spent the same amount of time on music related activities—But, the elite performing violinist spent more than twice the time (25 hours) on deliberate practice than the other violinists (10 hours).

To further reaffirm their findings, the researchers conducted additional research into the violinists' practice habits.

This time, they estimated how many hours of deliberate practice each violinist had accumulated over their lifetime.

Once again the results were staggering.

" ... the most elite violinists accumulated about the same number of hours of deliberate practice (about 7,410 hours) by the age of 18 as professional middle-aged violinists belonging to international-level orchestras (about 7,336 hours)! By the age of 20, the most accomplished musicians estimated they spent over 10,000 hours in deliberate practice, which is 2,500 and 5,000 hours more than two less accomplished groups of expert musicians or 8,000 hours more than amateur pianists of the same age." (3)

The best violinists had exceeded the 10,000 hours of deliberate practice required to become world-class in any field. This has been well noted by Malcolm Gladwell's work in his book [Outliers\(audiobook\)](#). 10,000 hours isn't necessarily the exact threshold —but it does highlight a very important factor in creating genius level work — **great work requires a great amount of hours in deliberate practice on your craft.**

Hi Friends,

I do wish I had a magic ball, however I think the MMs drop the Crude Oil price with a RT, then PB making CAD better again due the location of the PA and the controversy with the with tariffs as well as US Fed increasing % and Trump controversies ... who knows. However, I am staying bearish for now:
