*go to indicator

*paste the

*refresh ur pc and login

*go to insert

*go to indicator

*go to custom

*check all files I sent you and and insert the one by one

HOW TO USE

You will fine red zone and green zon

When the market it's a red zone you only enter sell signals you wait for the arrow to close and show a different color candle then enter

When market it's at the green zone you look for buy signals

you wait for the arrow to close and show a different candle which will be bullish

MODIFIED SOFTWARE

When the market it's at the green zone you don't use the arrow you will just wait for

the market to tell you bullish ,engulfing,cross or hammer then you enter

When the market it's at the red zone you only look for sell signals the modification system will tell you bearish,engulfing or bear cross

you enter and put ur sl und the setup always
