## Trading Broker and Tools :

- Corti EA is **optimized** with the broker [GlobalPrime.com](https://www.globalprime.com) for Demo/Live Trading.
  - I use this [POWERFUL & CHEAP FOREX VPS from Contabo](#)
- 

## SERIOUS WARNING

- Most Forex traders lose all their money.
  - Using Corti does not guarantee success.
  - Trading this robot could lead to serious financial loss.
  - Trading this robot without understanding its underlying trading strategies guarantees traders will lose their money.
  - This is not a set-and-forget EA; This EA might require manual intervention.
  - At best, a trading robot is only 90% as good as the manual strategy it trades. At best. At worst, it can be much less effective.
  - To trade this robot, you have to understand: **How to use EA's.**
  - **To trade this robot, you need to test in demo accounts to understand and learn it.**
-

# Introduction to Corti v1.4

Corti v1.4 is an Expert Advisor for MetaTrader 4 which is designed to trade Correlated Pairs or Cross Currency Triangulations with a recovery step used used by a fellow trader [here](#).

## Logic how it trades.

- ❖ Buy / Sell pairs list separated by comma. It is usually advised to trade triangulares which you can find in the list [here](#) and follow us in Discord for further development.
- ❖ The Group is hedged directly and all them await the **first TP** till it closes as a basket.
- ❖ Than it can close to last TP or if it has activated the Recovery Step Equity it opens the same active group.
- ❖ It can go up to 3 recoveries with the same logic of equity recovery and awaits till last TP is triggered.
