

Forex Profit Supreme

About The System

Forex Profit Supreme is a manual trading strategy that you can use to generate profits from forex market every day.

It was designed to be very simple and very powerful at the same time. And unlike most trading systems all over the market, this system is tested for a long time and proved to be profitable even in the worst market conditions. The reason for that, is that was designed based on the most powerful trading method which allows you to follow many currency pairs at time.

At the same time, the system was meant to be very simple. You don't have to be an experienced trader to be able to use it. In fact, even if you have no trading experience at all you would still make a lot of money from it just like pro traders.

There are many people that sign up to trade Forex that don't understand or take the time to learn how and why to trade Forex. There are many risks involved in trading any kind of asset, whether it is stocks, bonds or currencies. If you are interested in trading, make sure you understand Forex risks.

One of the biggest Forex risks is a leveraged buy. Some Forex brokerages allow you to hold a certain amount of money in your account but leverage that amount to up to 100 times its worth. While this can be good if you are on the winning side of a trade, this can be devastating if you lose your entire accounts worth plus many times more.

So please, before you start trading .. make sure that you understand and apply money management rules. No matter how powerful the trading system is, without money management .. it will become a time bomb! We recommend not to risk more than 2% of your initial capital per trade.

Along with this pdf manual we will add some usefull information which must be read as bonus.

The screenshot displays a trading platform interface. On the left, a list of currency pairs is shown with their current prices and changes. The main area features a candlestick chart for the AUDNZD, H4 timeframe. A window titled 'Indicators on AUDNZD, H4' is open, showing a list of indicators applied to the chart. The indicators include 'ForexProfitSupreme Meter', 'ForexProfitSupreme Bars', 'ForexProfitSupreme Signal', 'ForexProfitSupremeClock', 'Indicator window 1', 'ForexProfitSupremeFilter', 'Indicator window 2', and 'ForexProfitSupremeDline'. The bottom of the screen shows a horizontal bar chart with red and blue bars, and a line graph at the very bottom.
