Upper Breakout line
first M5 candle close above upper Breakout line> open buy trade
SL = M5 candle close under upper Breakout line
SL = M5 candle close under middle Breakout line

Bottom Breakout line
first M5 candle close under Bottom Breakout line > open sell trade
SL = M5 candle close above upper Breakout line
SL = M5 candle close above upper Breakout line

The upper and bottom Breakout lines should be selectable as:
Signal by breakout and the opposite as SL
as ex. > first candle close above upper breakout line > SL will be candle close bottom breakout line and open sell order
and vice versa

The middle Breakoutline should be selectable as optional SL for long and short orders
