| Trader | Before NFP | | | After | |
|--------------------------------------|--|----------------|---|---|---|
| Poster before the Fact (Sort A to Z) | | | | | |
| Cloggie | Put me down for 3185 | Short |  | <p>No brainer trades, just watch the interim hurdles.</p> <p>3320-3330 is the current hurdle.</p> <p>Ultimate target 3407</p> |   |
| ganesha | I think we could spike up to 100 points down (1.3150 more or less) and 150 points to the upside (1.34 more or less) | Neutral |   | | |
| iflyjetzzz's | I expect the EUR to rise on a good NFP number. I will open a small long position prior to the release. I will also have a market sell order loaded and ready to execute once the number is released. | Longs |  | <p>Closed long position at 06:30:27 for 1.32593 / Closed long position at 06:30:27 for 1.32593</p> <p>Opened short position at 06:45:54 for 1.3329. Closed short position at 06:47:49 for 1.3326.</p> |   |
| kuroro001 | i share the same view as Hatch...chart posted this morning. | Fake and Short |  | | |
| moonchild | I am thinking that the NFP will be neutral or good / the pair to drop back down to 1.3200 with a view to its continuing down afterward | Shorts |  | | |
| Mr Hatch | headfake, then drop. no levels so far. | Fake and Short |  | | |
| PayTheLimit | 3187/3195 is still acting as good support / topside 3227 looks like its done its job thus far. Above there I'll watch 3260, and we will all watch 3299 / I'll add 3374 up top | Longs |  | <p>I like the long side but I've lost the urge to trade. I'm staying out. Have a good weekend.</p> |  |

| | | | | | |
|--|---|-----------------------------|--|--|---|
| sisse | <p>1. Short limit @ 1.3238x with target 1.317x where take profit and reverse to 1.330x.</p> <p>2. Price shoot to 1.330x without triggering 1. Short but not with limit order but with confirmation of break up and down in fast timeframe. Target 1.314x and adding one more short if it break below.</p> | Shorts / and Fade and Longs |    | it went too far up for my taste so I am canceling all my potential trades (I called earlier). |  |
| SugarTrade | Possible dollar bounce coming soon. however, I am uncertain at this time. | Shorts |  | | |
| The Fool | expect a green number to print. E/U will drop no further than .3166 / fade it long from there. should recover to .3250 quickly and could push through .3300 in early ny | Fade and Longs |   | | |
| Z3iz3i | Today NFP likely is upside / Aroundbouts 1.3225/30 looks good place to put stop | Longs |  | | |
| Couldn't determine the time / a few second after release | | | | | |
