5 shifted ema:

Basically this is a visual reference. When a candle is crossing it the green TDI line is crossing red also.

Entries and exits...

TDI... Is it going up (long) or coming down (short)... that's the direction to trade.

We **Enter** a trade when green crosses red on the TDI at the beginning of the new candle... usually candle 1 or 2. If it's candle 3 or more (as in the third bull candle in up move and third bear candle in down move) don't enter... find another trade set up. The only exception is if green bounces off red and continues... it's ok to re-enter on the bounce...

A set up is NOT GREEN TOUCHING RED. Why? Many times green bounces back and the original direction continues. That's a bounce trade.

Exit your trade when the green TDI line goes flat, starts to hook over or makes a check mark reversal.

If you add other things it will influence your decisions... usually to your detriment. Don't try to complicate it thinking it can't be this easy. Hence the name Trading Made Simple.

Important to study TDI entries on old charts, any time frame... Give yourself a chance and trade it like it's laid out..

In regards to stoploss:

I hate S/L trading. If you feel you want it the safest way is to place your S/L at the last hi or low a couple of candles back...

Demo it:

Take your time and learn. Demo trade it until you feel you got it.

Be sure to brows through the thread and look at the training charts that are and will be posted. Look at charts others have posted too. A picture tells a thousand words.

NEW update: 4/29/2011

Your safest trades will always be when green crosses red and you enter on candle 1 or 2... odds are in your favor. Why? Because I'm expecting 3-8 candles... which is average...

With bounce trades the odds are lower for your success... but it still works.

When wanting to enter a TDI trade... take a moment first to observe basic 4x things... like:

How close am I to the previous high or lo

Am I in an uptrend or downtrend.. short & long term...

Am I in or close to a consolidation area

Are the previous candles small...

Look at the candles on the last reversal... big, little, what

How does the momentum look right now (12-2, 4-6) {Referring to angle of green tdi line and Stochastics as if it were a clocks hands}.

Does Stoch's confirm the TDI signal

Sounds like a lot of stuff but it's basic stuff and only takes a moment to observe it...

If you don't already know these things... don't trade live yet... www.babypips.com is a good place to learn about the basics of trading 4X.

New update: 5/1/2011

Eelfranz's mindset:

My attitude is "I'm gonna win every trade I enter". I'm confident. Now and then I get my butt kicked but so what... I learn from it and move on. I see it like stepping into a gopher hole... I didn't see it... I get up and get going.

Every time I trade I image going to the bank with my wheel barrow. I know there going to pay me... I just don't know how much today. Throw your fear into the trash... walk away and don't look back. I tell the market in my minds eye "I refuse to be beaten... I'm smarter than you because I've figured out an easy system to whop your butt". Don't take any crap from the market... your better than it is... don't listen to the downer rumors and excuses... kick ass in your mind and your attitude towards the market... I'm

fired up the more I type it. Hot damm. Got to get a bucket of water to splash my keyboard to cool it down.... brb...

Trading isn't difficult... over coming your fears is the problem in most cases. Decide in your mind to take control & kick bootie. Until you do that you will never be more than a minimum trader. Tell the market to go to hell... your here now... grab the horns... get some... b.... well you know...

Fear in peoples lives destroys so many. There is nothing to fear in the market. Practice, practice, practice on DEMO. THAT'S THE ONLY WAY TO BUILD CONFIDENCE. I took a "year off" of live trading and just studied old charts building my confidence.... trading Demo Only. Now I have no fear to push the button... take the trade. Sometimes I exit too early and miss another 50 pips... so what... I'm on the prowl looking thru my charts looking for the next trade. If there is none... click off and check back later.

Develop the attitude "*You can't beat me sucker" I'm here to clean your clock.*" I'm serious. Make the market bow to you!
